Corby Battery Energy System Project

I have been following BESS installations for the past five years.

There are safer alternatives to lithium batteries.

Please stop rushing the deployment of these and placing them too close to where humans live and work.

The facilities situated in the desert, such as Edwards Air Force Base, make sense.

There is no excuse for reckless endangerment. This is not going to bode well for the Governor's legacy.

Please say "no" and find safe alternatives. Thank you, Trinnette Nelson
