Public Comment about Soda Mountain Solar Project

Please do not approve the Soda Mountain Solar Project. The amount of fugitive dust raised, precious water used/wasted, desert habitat for flora and fauna ruined, historic artifacts and cultural sites destroyed, over-heating of the environment, and general eyesore /blinding pilots flying overhead are reasons enough. Solar panels belong on rooftops of existing buildings and existing parking lots, where the power generated can go directly to the building that will use it, thus also eliminating the need to proceed with GreenLink / GridLiance projects. We only have one chance to preserve what is left of the beautiful Mojave desert.
