Docketed Date:	8/12/2025

Comment Received From: Raya Power
Submitted On: 8/12/2025
Docket Number: 25-SOLAR-01

Scoring Criteria

The scoring criteria includes cost-effectiveness, but it does not relate this to the number of homes impacted. A suggestion for the scoring criteria is to include points for impacting more homes with the same budget. This may mean smaller systems for each home, or being more cost effective, while still hitting the 20% savings threshold. This would allow more homes to be positively impacted in some way with the budget, vs. a few homes impacted with larger systems.
