No to Soda Solar

The Soda Solar Project would be a huge devastating blow to the fragile desert environment. It would also harm we the people's recreational use of the land. The desert is NOT an empty barren wasteland as everybody treats it, the desert is a beautiful fragile ecosystem full of life that needs to be protected. It is also home to many of us—a sacred place that defines us, our history, and our future. This project will only harm this land at the expense of all desert dwellers, plant, animal, human, or otherwise.
