soda mountain solar project

Sirs,

please do not allow the "soda mountain solar project" to go ahead.

1) its in the Mojave desert, which needs to be preserved
2) solar projects should go onto home rooftops, building rooftops, over parking lots, ie where we've already cleared away the original wild flora and fauna, but should NOT go in wild areas. Soda mountain is adjacent to Mojave National Preserve and will be disruptive of it (the Preserve should be much larger).

sincerely,

Peter A Lawrence, San Jose, CA.
