### **!!!Burrowing Owls Present in study area**

Looking at the Biological Resources Report for this project, there are burrowing owls within the study area. There are several locations as identified by residence in our community. Hopefully some will send in their reports. I have seen a burrowing owl on my property and on my back fence out to the canal (barely outside the study area) on January 28 and 29. See photos. I know there are several dens and owls near Kilkenny and Byrnes (definitely inside the study area), and on the property of the house on Kilkenny, hopefully he will write in also.

*Additional submitted attachment is included below.*

The photo below was taken on my property on the opposite side of the fence shown in the 2<sup>nd</sup> picture (this area is slightly outside the survey area).

The orchard and green field you see in the photo below are WITHIN the project survey area.
