SAFE AND HEALTHY COMMUNITIES

The government has a the fiduciary responsibility to the people they represent. I would say it is a high risk dangerous that this community is not prepared for, nor wants. The government also has a responsibility to keep their community in the health condition that they find it and when they leave office, it should be in the order that they took it or if not better. It is my opinion that the representatives of San Juan Capistrano Orange County supervisors to allow this dangerous. Facility to go in near families near children what can motivate it except for personal greed? There is no benefit in having this facility in our neighborhood. The recommendations are far from schools, families parks, and any potential drainage into the water system or the ocean I can see no benefit to the community. I can see no cost savings to the community. This is an expensive error we will incur. The potential for health damages to our community and the ocean, our environmentâ€¦Itâ€™s insane to allow this to happen.
