State Bill X1-2

In a vote slated for tomorrow (Friday) you plan to delay by five years a policy that would limit refiner margins. The profit cap, passed by the legislature and signed by Newsom in 2023, aimed to mitigate price spikes for California drivers. Postponing it walks back years of regulatory scrutiny on the state's oil and gas industry.

The planet is burning. We MUST cut back on fossil fuels! Please do not delay implementation of this policy. The people of California deserve better.
