Acton against 70 acres of toxic batteries

My wife and I have lived in Acton for over 40 years and letting these batteries for power to be installed near a community and a high traffic freeway that cannot be controlled when they catch on fire and their fumes are toxic is very unhealthy for our community. A lot of the power thatâ€™s being stored is coming in from the desert from all the wind and solar batteries out in the desert. We have a giant desert right next to us doesnâ€™t make any sense why they wouldnâ€™t put these batteries out in the desert away from populated areas, if our government allows us to happen, they should be put out of office Chuck Mercier.
