Opposition

This project would be devastating to Acton residents and surrounding areas. Insurance premiums will undoubtedly increase drastically and property values would decline. A fire would send toxic air into the air and sever Antelope Valley as the 14 freeway would be shut down as well as the railroad, both which are nearby. Water to fight the fire would go to the nearby Santa Clara River. The area sits on top of the Soledad Earthquake Fault and only 5 miles away from the larger San Andreas Fault. With all this energy being stored Acton will not even benefit from.
