PRAIRIE SONG RELIABILITY PROJECT BESS

I have lived in this town for 40 years. With the potential of these BESS project coming into our town bringing with it a very "HIGH" fire danger - especially in a HIGH Wind read such as ours, bringing our property values down (since these facilities have to be address to any new property owner during sale), our Homeers Property Insurance is already through the roof - this would make it almost impossible to obtain or afford insurance, and we are already regarded as a HIGH FIRE AREA.

Should there be a problem with fire - the surrounding homes/people/animals would be in danger of toxic chemicals, toxins into the underground water (which people have underground water wells),

These types of facilities -BESS such as this, goes against our rural community and our Acton residents.

This BESS facility will be larger an the larges battery facility - which has the potential to WIPE OUT our town of Acton and surrounding areas.
