Docket 22-EVI-04

To: ChargePoint

From: CEC Fuels and Transportation Division Staff

Re: Response to Request for Extension

In regard to the September 18, 2025 request to extend the comment period for an additional 14 days, the request is denied. The noticed timeline will remain in effect.

The additional time was requested to, as stated in the comment submitted, allow “deeper consideration” of two documents incorporated by reference into the Express Terms: the Semiannual Charging Data Reporting Specification of the Data Dictionary and Hourly Charging Data Reporting Specification of the Data Dictionary.

The data dictionaries referenced above constitute a reformatting of requirements specified in the regulations published on June 27, 2025, when the regulations first became public and introduce no new regulations or requirements. The data dictionaries provide a template on how to format data specified in sections 3123 and 3125 in the Express Terms and reflect minor changes to the Express Terms which were noted in the Notice of Additional Comment Period. The data dictionaries are sufficiently related to the original proposed regulations on June 27, 2025 and were included in this rulemaking to provide clarity and to respond to commentors who wrote requesting such clarity.
