proposed BESS project in Acton

When the commission meets to discuss the proposed BESS project in acton, I am begging you as a long time resident of Acton to please please please do not poison us with that project!

There are so many desolate places in the desert, where there are no people living close by, we have this project could be placed. For example, in the solar fields in west Palmdale.

This proposed project will be right out in plain sight, which will spoil the rural atmosphere of our community

But even more threatening is that we live in a high wildfire area, and the fire danger of this project is enormous! So frightening! And if it catches on fire, there is no technology to put it out, and it gives off toxic fumes and residences are forced to evacuate for days at a time.

The project that failed in Morro Bay is the perfect example.

I beg you to consider the residents of Acton , and deny their proposed dangerous facility, it can be placed so many other places where no people live

Thank you, Patricia Akkad
