Prairie song reliability project

I oppose this project. The location is terrible. Several safety concerns...proximity to access to antelope valley. Proximity to vital railway, high risk fire zone, very windy location with the potential to exponentially spread fire and toxins in event of emergency. Proximity to an electric substation. Proximity to known fault line. Proximity to watershed and season waterway. There are not enough safety implements in place to prevent a catastrophic event. No on this project. Find a more suitable location. The risk is too great
