BESS Bad

There are several BESS projects planned for the Acton area. Even one is too many for many reasons, including:

The proposed battery technology is not appropriate due to thermal runaway. Even if only one burns, the smoke will impact the people and their animals - including mine - in Acton. If water is used to fight the fire, where is the water coming from? Where will the runoff be safely stored & then disposed of? Acton is known for high winds, making any sparking very dangerous. Facilities like those proposed have NO business being placed near homes and ranches and in a windy area. Acton will see zero benefit, but will assume all of the risk. Stop it. Do not allow a single BESS facility in/near Acton.
