Prairie Song BESS proposed for Acton

We have lived in Acton since 1993 – over 30 years ! We are extremely concerned over proposals to build lithium battery facilities – in our high fire risk area – and the potential environmental risks of such a facility to our community! We are fully dependent upon ground water for all our water needs like many residents in this community – and we’re absolutely prettified of the potential damage and toxic pollution a lithium battery fire would cause, if despite best laid plans, any of these planned facilities suffered damage from any number of possible causes – and triggered a catastrophic accident in our community! Many of my Acton neighbors have lost their homeowners fire insurance policies because of our high fire risk – and basing lithium's battery installations in our community will likely make it even more difficult to retain fire and related liability insurance for our homes ! Not to mention that basing these industrial facilities in our rural area – any the general risks such facilities pose to our community – will certainly damage our property values!

Please Don’t approve the Prairie Song BESS or any other like BESS facilities to be based in northern Acton – and our high fire risk community!!
