No On BESS Facilities

We are strong against any Bess facilities being located in the populated area of Acton California. These facilities have a very strong possibility of causing fire that cannot be extinguished with water, toxic fumes, possible contamination to our water supply - we are on well water - fire danger to evacuate, most of us have large animals that cannot be left behind. To have this put in Acton for ONLY the reason as it is close to a Station for hook up is not a reasonable approach vs the damage it could possible incur to the area and not to mention that it will lower the value of our homes and make it nearly impossible to get fire insurance. We have a HUGE Fire area as it is without facilities that are this dangerous to have nearby. We have also High Winds that we have several months a year. It is just too much to ask for this rural community just because it has a little space and close to the Vincent Hill Station. This is just not the place for these facilities.
