Prairie Song Reliability Project

Why would yo build something so dangerous in the middle of a residential area? You would also be putting this in a high/wind fire zone. We already have enough issues when the wind kicks up with Southern California Edison turning off our power due to "Fire Hazards". Those of us who live very close to the proposed sites will experience higher insurance premiums if not dropped all together. Then there's the issue of the Lithium Iron Phosphate Batteries which are highly unstable and very toxic. IN A RESIDENTIAL/RANCH AREA???? This will devalue our properties and make them very difficult to sell in the future. I in particular live about 1 mile from the proposed sites. We the people of Acton DO NOT WANT our quiet rural community industrialized! KEEP ACTON RURAL!!!
