## **Public Citizen Concern**

I am writing to ask that you table item 9d: the proposed \$3,000,000 grant to Port San Luis Harbor District for yet another feasibility study of an Offshore Wind Operations and Maintenance port. A previous feasibility study was already granted (\$1,000,000) in September 2024 by the County of SLO and the consultants were given an extension until June 2026 yet NONE of the results have been shared with the public! Many of us have spoken about this at the Harbor Commissioners meetings and the Community Meetings in Avila, asking that the results of the studies be made public yet we've received NO response! We feel it would be prudent to learn about the results of the existing study before California taxpayers sink another 3 million dollars into these efforts! Thank you for doing what's right for California taxpayers by tabling this grant today and urging the Harbor Commission to reveal the results of the first study to the public.
