SLO offshore wind energy Operations & Maintenance port

I am writing to request that you table item 9d - which funds a \$3 million grant for the Port San Luis Harbor District to conduct a study on the feasibility of an offshore wind energy Operations & Maintenance port. I am making this request due to the fact that the County of San Luis Obispo has already committed \$1 million for a feasibility study in this location, and that study is still ongoing. It seems illogical and wasteful to fund another study before knowing the results of studies underway. Let's wait for the results of the two existing studies before moving forward with a third. Thank you for doing the right thing for California tax-payers and tabling this grant today.
