## **Corby Battery Energy Project**

Dear Energy Commissioners, I would like to express my sincere appreciation to the Commission in asking NextEra to relocate the Corby BESS project to the Lambie Industrial Park in Solano County. The current project site location is unsuitable because it will place prime agricultural land at risk should a hazardous fire event occur. Within the proximity of the proposed Corby BESS site resides hundreds of families as well as businesses, they will be at risk of evacuation and potential exposure to toxic air. A major Interstate highway could be impacted. It is my understanding that a review taken by NextEra has confirmed that the Lambie Industrial Park is feasible and thus meets the core Corby Project goals. To conclude, the Lambie location for the Corby BESS Project is the appropriate site. It will be a safer local, further from homes, businesses, schools as well as the I-80 corridor. The Lambie Park location is zoned industrial, conforming with the new Solano County BESS Ordinance. Prime farmland and a generational way of a livelihood will be preserved. Thank you for the opportunity to address the Commission with this important matter.
