Strongly support Corby at Lambie Industrial Park

Dear Commissioners,

I am writing to commend the Commission for requiring NextEra to evaluate the Lambie Industrial Park as an alternative site for the Corby BESS Project, and to strongly urge you to consider the Corby BESS project being located and approved at this site instead.

NextEra's own analysis confirms that the Lambie Industrial Park is entirely feasible. Their objections amount to minor inconveniences—like a longer transmission line or a procedural delay. These logistical hurdles are negligible compared to the critical need to protect our community and preserve Solano County's irreplaceable farmland over the project's multi-decade lifespan.

The current proposed site is simply unacceptable: it threatens prime agricultural land, increases safety risks near homes and major roads, and goes against our county's land-use priorities.

Lambie Industrial Park is the clear answer: it is already properly zoned for industrial use, significantly safer, and represents a responsible, community-aligned path forward for this clean energy project.

Please demonstrate your commitment to sustainable development by requiring NextEra to further investigate locating the Corby BESS Project at the Lambie Industrial Park location as soon as possible.

Thank you for your leadership in protecting Solano County
