CalCapture CCS Project

Phase I Environmental Site Assessment Report

Prepared for:
Carbon TerraVault Holdings, LLC, a carbon
management subsidiary of California Resources
Corporation

October 2025

Prepared by:
Stantec Consulting Services Inc.
2646 Santa Maria Way, Suite 107
Santa Maria, CA 93455

Project/File:
185806775

Disclaimer

The conclusions in the Report titled CalCapture CCS Project Phase I Environmental Site Assessment are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from Carbon TerraVault Holdings, LLC, a carbon management subsidiary of California Resources Corporation (the "Client") and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided by the Client to applicable authorities having jurisdiction and to other third parties in connection with the project, Stantec disclaims any legal duty based upon warranty, reliance or any other theory to any third party, and will not be liable to such third party for any damages or losses of any kind that may result.

Eli Hill
Environmental Scientist

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of Title 40 of the Code of Federal Regulations, Part 312, (40 CFR 312). I have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1 Introduction

The objective of this Phase I Environmental Site Assessment (ESA) was to perform All Appropriate Inquiries (AAI) into the past ownership and uses of the Subject Property consistent with good commercial or customary practice as outlined by ASTM International (ASTM) in *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation E1527-21. AAI is the process for evaluating a property's environmental conditions for the purpose of qualifying for landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) following final rule of Part 312 of Title 40, Code of Federal Regulations (40 CFR Part 312). The purpose of this Phase I ESA was to identify, to the extent feasible, adverse environmental conditions, including recognized environmental conditions (RECs) of the Subject Property, which ASTM defines as:

1. The presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment.
2. The presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The ASTM E1527-21 standard indicates that the goal of the Phase I ESA is to identify RECs, as well as historical RECs (HRECs) and controlled RECs (CRECs), that may exist at a property.

ASTM defines a HREC as a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority and meets current unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., activity and use limitations [AULs] or other property use limitations). A HREC is not considered a REC.

ASTM defines a CREC as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) but with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., AULs, institutional controls, or engineering controls).

As defined by ASTM, RECs can include hazardous substances or petroleum products present under conditions in compliance with laws if that presence represents a material threat of future release. The release of hazardous substances or petroleum products is, however, not a REC if that presence is a *de minimis* condition. *De minimis* conditions are minor releases that generally do not present a material risk to human health and would not likely be subject to enforcement action if brought to the attention of governmental agencies. ASTM also considers the potential for a business environmental risk (BER), defined as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of the Subject Property, not necessarily limited to those

CalCapture CCS Project – Phase I Environmental Site Assessment Report

1 Introduction

environmental issues required to be investigated by the ASTM standard. Consideration of BERs may involve addressing one or more ASTM non-scope considerations.

This Phase I ESA was conducted in accordance with our proposal to California Resources Corporation (CRC) dated October 28, 2024, and Client's authorization on October 31, 2024. Additional proposed laydown areas were added to this Phase I ESA following a change order request prepared by Stantec Consulting Services Inc. (Stantec) and accepted by CRC on April 9, 2025. The scope of work conducted during this Phase I ESA consisted of a visual reconnaissance of the Subject Property, interviews with key individuals, and review of reasonably ascertainable documents. The scope of work did not include an assessment for environmental regulatory compliance of any facility ever operated at the Subject Property (past or present) or sampling and analyzing of environmental media. Stantec was not contracted to perform an independent evaluation of the purchase or lease price of the Subject Property and its relationship to current fair market value. The conclusions presented in this Phase I ESA report are professional opinions based on the data described herein. The opinions are subject to the limitations described in Section 1.4, Exemptions and Limiting Conditions.

ASTM E1527-21 notes that the availability of recorded information varies from source to source. The User or Environmental Professional (EP) is not obligated to identify, obtain, or review every possible source that might exist with respect to a property. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. Reasonably ascertainable means:

1. Information that is publicly available.
2. Information that is obtainable from its source within reasonable time and cost constraints.
3. Information that is practicably reviewable.

1.1 Subject Property Description

The Subject Property consists of three main areas referred to in this report as: the Elk Hills Power Plant (EHPP) Area; the 10G Staging Area; and the 11G Staging Area. Assessor's parcel numbers (APNs) associated with the Subject Property are listed below:

Assessor's Parcel Number	Section/ Township/ Range	Acreage
158-090-19	Section 35/ Township 30S/ Range 23E	590.61
158-090-16	Section 35/ Township 30S/ Range 23E	14.78
158-090-02	Section 26/ Township 30S/ Range 23E	640
158-090-04	Section 34/ Township 30S/ Range 23E	682.86
298-070-05	Section 11/Township 31S/Range 24E	640
298-070-06	Section 10/Township 31S/Range 24E	640

The first area, referred to in this report as the EHPP Area, comprises approximately 20.7 acres of land proposed for temporary or permanent use and 3.3 miles of proposed linear features (carbon dioxide [CO₂] pipelines, water lines, electrical cables or conduits) located approximately 6 miles west of the town of Tupman, in Kern County, California. The area in which the Subject Property is located is currently developed to support power generation operations in addition to oil and gas extraction and processing. Existing improvements to the EHPP Area include both unpaved and paved roads, parking lots, and storage areas. Improvements in the vicinity include hazardous and non-hazardous materials conveyance pipelines, aboveground storage tanks (ASTs), a power plant, parking lots, and various maintenance and operations facilities. The Subject Property is zoned “A-1 Limited Agriculture” and “A: Exclusive Agriculture” under the general plan use of “Mineral and Petroleum (min 5-acre parcel size)”. The Subject Property is owned and occupied by CRC and is used for power generation and oil and gas extraction and processing.

The second area, referred to in this report as the 10G Staging Area, comprises approximately 15.8 acres located 4.95 miles southeast of the EHPP Area, 0.2 miles west of Tank Farm Road, and 1 mile northwest of the Taft Highway, California State Route 119. The 10G Staging Area comprises five elongated retention basins that are proposed to be closed prior to the start of the CalCapture project as part of a separate CRC project and used as a staging area during the construction of the CalCapture Project. No specific street address has been identified for this area. This area is encompassed by APN 298-070-06.

The third area, referred to in this report as the 11G Staging Area, comprises approximately 3.2 acres north and west of the central office building, located approximately 500 feet northwest of Taft Highway, California State Route 119, and 1.3 miles east of the 10G Staging Area. The approximate street address for these work areas is 28590 CA-119, Tupman. The area currently comprises two paved parking lots in addition to two unoccupied office trailers and is proposed to be used as staging and laydown areas during redevelopment. This area is encompassed by APN 298-070-05.

Adjoining properties, as well as the nearby surrounding area, are developed to support oil and gas processing and extraction. A Subject Property Location Map is provided as Figure 1. Subject Property Vicinity Maps illustrating the main features of the Subject Property are provided as Figures 2a and 2b. The proposed developments and temporary workspaces are shown in Figures 2a and 2b. Photographs taken during the site reconnaissance visit (along with an annotated site map) are provided in **Appendix A**.

1.2 Project Description

The proposed Project would capture carbon dioxide (CO₂) generated as a by-product by CRC's 550-megawatt-equivalent (MWe) Elk Hills Power Plant (EHPP), located in the EHOE near Tupman, Kern County, California. The EHPP was commissioned in 2003 and is powered by two General Electric 7FA gas turbines (GTs), with two heat recovery steam generators (HRSGs) providing steam to a General Electric D11 steam turbine (ST). The Carbon Capture Unit (CCU) would be located immediately south of the EHPP in a 7.64-acre existing disturbed area.

CalCapture CCS Project – Phase I Environmental Site Assessment Report

1 Introduction

Implementation of the Project will require approval of a Petition for Modification Application from the California Energy Commission (CEC), who has the exclusive authority for licensing thermal power plants of 50 MW or larger, as well as related transmission lines, fuel supply lines, and other facilities.

The CCU would utilize Fluor's Econamine FG PlusSM (EFG+) process to capture and concentrate the CO₂. The EFG+ process is designed to capture 95 percent of the CO₂ from the total flue gas feed to the unit. The EFG+ CCU can be divided into seven primary subsystems or sections: Flue Gas Cooling, CO₂ Absorption, Solvent Regeneration, Solvent Maintenance, Chemical Storage and Supply, CO₂ Compression, and Utility Support Systems. The treated flue gas is vented to the atmosphere directly from the EFG+ CCU plant absorber. The concentrated CO₂ would then be compressed, dehydrated, and stripped of oxygen prior to conveyance to the permitted manifold pad, permitted as part of the approved Carbon TerraVault I (CTV I) project (State Clearinghouse No. 2022030180), which will direct the CO₂ to the U.S. Environmental Protection Agency (U.S. EPA) approved Class VI Underground Injection Control (UIC) wells to be injected into a depleted oil and gas reservoir located on the CRC property and approved as part of the CTV I project. The previously approved CTV I manifold pad, injection wells, depleted oil and gas reservoir and related facilities further discussed in Section 1.2 below are not part of the CalCapture CCS Project analyzed in this report.

A new, approximately 0.5-mile, 8- to 10-inch pipeline, installed primarily below ground utilizing either trenching or horizontal directional drilling (HDD) techniques, would transport the CO₂ from the CCU to the tie-in with the Carbon TerraVault I (CTV I) permitted 35R manifold facility (pad). It is anticipated that the proposed Project would capture approximately 4,400 metric tons of CO₂ per day (MTPD) (1.6 million metric tons of CO₂ per year [MMTPY]). The proposed Project is estimated to be in operation for up to 26 years.¹

Water use during operation of the CalCapture CCU would be minimized by the inclusion of a hybrid cooling system (Wet Surface Air Coolers [WSAC], air coolers, secondary glycol cooling, and water cooling). Additionally, the CCU would be equipped with a water treatment system, consisting of a reverse osmosis (RO) Unit that is designed to recover and reuse water from the Cooling Tower blowdown. The recovered water is utilized as make-up to the CO₂ absorption system and the Wash Water WSAC Basin. A wastewater stream (less than 10 gallons per minute) would be collected at the CalCapture CCU and transferred by a new surface pipeline to the EHPP for disposal via an existing UIC Class I injection well.

The proposed Project includes a single connection to the CRC Power System and would include a connection of a new 115-kilovolt (kV) transmission line to a new CRC electrical substation. The proposed Project would require a new transmission tie line to connect the Project switching station to the existing CRC substation. Electrical power would be supplied to the CalCapture Substation with a new dedicated electrical transformer. The new 115-kV transmission tie line is expected to be built using pre-engineered steel poles with anchor bolt foundation designs. During construction, temporary offices and existing parking areas would be used by construction personnel. Temporary office and parking areas have been

¹The life of the project is dependent on the sources permitted for injection into the CTV I approved storage reservoir, the ability of the project year by year to obtain CO₂ and inject at the maximum 2,210,000 million tons per year, and the total estimated storage capacity of up to 48 million tons of CO₂.

designated on previously disturbed areas to the south and northeast of the Project site. Two additional areas are located approximately 5.5 miles southeast of the Project site. There are no permanent new buildings proposed for the Project, and no grading would occur within the temporary office and parking areas. Total temporary staging and parking area would be approximately 30.74 acres.

Portions of the CalCapture project site, including primarily the CCU facility, are located within the former Department of Energy (DOE) 35R Gas Plant site. The DOE (responsible party), in coordination with Department of Toxic Substances Control (DTSC), is working towards further delineation and closure of the site, targeted for 4Q 2025 – 1Q 2026. As impacted soils and soil gas are anticipated to remain, DTSC will require environmental restrictions under a recorded Land Use Covenant (LUC). CRC is the surface and mineral owner responsible for implementation of the recorded LUC. The recorded LUC is expected to include a soils management plan for any future disturbance activities. Following closure of the site, CalCapture construction and operation activities will comply with all conditions of the recorded LUC.

1.3 Special Terms, Conditions, and Additional Assumptions

Due to the hazardous nature of the operations conducted at the Subject Property, certain areas were inaccessible to Stantec personnel during site reconnaissance such as the oil and gas processing facilities and the Elk Hills Power Plant. Observations of materials and processes within these restricted areas were made from safe vantage points, where possible.

1.4 Exemptions and Limiting Conditions

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties, or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the Subject Property.

This report provides an evaluation of selected environmental conditions associated with the Subject Property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information received from others.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available, and the results of the work. They are not a certification of the Subject Property's environmental condition.

The Client did not provide or contract Stantec to provide recorded title records or search results for environmental liens or AULs encumbering the property or in connection with the Subject Property. Additional data gaps are discussed in Section 6.2, Data Gaps.

This report has been prepared for the exclusive use of the Client identified herein and any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities, or claims, howsoever arising, from third party use of this report.

Project specific limiting conditions are provided in Section 1.4, Exemptions and Limiting Conditions.

The conclusions are based on the conditions encountered at the Subject Property by Stantec at the time the work was conducted.

As the purpose of this report is to identify Subject Property conditions which may pose an environmental risk; the identification of non-environmental risks to structures or people on the Subject Property is beyond the scope of this assessment.

The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Subject Property which is the subject of this report with any federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations, or policies of federal, state, provincial or local governmental agencies.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the property subsequently change.

1.5 Personnel Qualifications

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an EP. The credentials of the EP and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

2 User-Provided Information

ASTM E1527-21 describes responsibilities of the User to complete certain tasks in connection with the AAI into the Subject Property. The ASTM standard requires that the EP request information from the User on the results of those tasks because that information can assist in the identification of RECs, CRECs, HRECs, or *de minimis* conditions in connection with the Subject Property. Toward that end, Stantec requested that the User provide the following documents and information:

Description of Information	Description and/or Key Findings
User Questionnaire and/or Interview	The User indicated that the Subject Property formerly supported the Elk Hills Lean Oil Absorption Plant, which used a lean oil separation process to separate methane and liquid natural gas (LNG) components from a wet gas hydrocarbon stream. Gas products were sent to a sales gas pipeline, and liquid products were sent to offsite storage. The User indicated that they are aware of volatile organic compounds (VOCs) present in soils due to former plant activities. VOCs understood to be present include total petroleum hydrocarbons (TPH), tetrachloroethylene (PCE), trichloroethylene (TCE), benzene, ethylbenzene, chloroform, naphthalene, 1,1,2,2-tetrachloroethane (1,1,2,2-PCA), and 1,1-dichloroethane (1,1-DCA).
Environmental Liens or AULs	The User indicated that they are aware of a Land Use Covenant (LUC) proposed in 2025, which would require California Department of Toxic Substances Control (DTSC) approval prior to drilling for water, oil, or gas. Furthermore, the LUC would require a groundwater management plan to be approved by the DTSC prior to the extraction or removal of groundwater. The proposed LUC would limit the construction of any enclosed, occupiable structures and require a soil management plan to be approved by the DTSC and implemented during construction. No sensitive land uses, such as residential, hospitals, daycares, or schools for persons under 18 years of age, may be constructed without prior vapor intrusion evaluation and DTSC approval.
Previous Environmental Permits or Reports Provided by User	The User indicated the presence of a Soils Management Plan within the State Water Resources Control Board (SWRCB) GeoTracker database; a review of this document is below.
Purpose of the Phase I ESA	The intended use of the Phase I ESA is for due diligence in support of the future development of a carbon capture and sequestration (CCS) project on the Subject Property.

Stantec forwarded the ASTM recommended User Questionnaire to Eric Miner of CRC, Carbon Solutions. The completed User Questionnaire returned to us by Eric Miner and dated February 18, 2025, is included in **Appendix C**.

Eric Miner indicated that the site had an extensive history of operating as an active oil and gas extraction and processing field, and that VOCs including PCE and TCE were present within soils located onsite. Eric Miner also reported the presence of a LUC on the Subject Property, which would limit the construction of any enclosed, occupiable structures and require a soil management plan (SMP) to be

approved by the DTSC and implemented during construction. The presence of VOC impacts to soil vapor and the associated LUC is considered a CREC, as future redevelopment of the Subject Property, including the proposed construction of the Project, would require DTSC approved plans to be implemented prior to the initiation of the Project.

**Final Soil Management Plan, Former NPR-1 Closure Project, Elk Hills Oil Field, Elk Hills, California
– Langan Engineering & Environmental Services, Inc., November 16, 2022**

The User provided a copy of a SMP prepared for the Former NPR-1 (Naval Petroleum Reserve No. 1) Closure Project, of which two areas of concern (AOCs) overlap with portions of the Project and laydown yards (AOC-092 and AOC-030-003). The purposes and objectives of the SMP are to:

- Protect on-site workers from potential exposure to residual substances that may be associated with previous releases of chemicals or certain former source areas that may be encountered during soil disturbing activities;
- Establish requirements for soil management and disposal during EHOFF operations and other activities that might disturb contaminated soil in areas where residual chemical concentrations are currently known to be present or will remain in place above cleanup goals prior to or after regulatory closure is granted (i.e., AOCs with an no further action [NFA] designation with LUCs or ongoing monitoring/maintenance requirements, sites that have not yet received NFA designation, or sites where cleanup has not yet occurred);
- Provide protocols for managing Unanticipated Conditions; and
- Describe documentation required for work completed under the SMP.

The SMP states that constituents of concern (COCs) present in soil and soil vapor across the EHOFF include petroleum hydrocarbons, metals (specifically arsenic and chromium), VOCs, semi-volatile organic compounds (SVOCs), polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and organochlorine pesticides (OCPs).

Figure 1 of the SMP shows AOC-092 and AOC-030-003 overlapping with the proposed Capture Facility footprint and proposed 10G Staging Area, respectively. Table 1 of the SMP lists AOC-092 as having impacts of COCs at concentrations exceeding commercial / industrial cleanup levels from 2.5 feet below ground surface (bgs). Similarly, Table 1 lists AOC-030-003 as having impacts of COCs at concentrations exceeding commercial/industrial screening levels from 7 feet bgs. Refer to Sections 3.3.5 and 3.3.6 for more information.

3 Records Review

The objective of consulting historical sources of information is to develop the history of the Subject Property and surrounding area and evaluate if past uses may have resulted in RECs. Physical setting records are evaluated to determine if the physical setting may have contributed to adverse environmental conditions in connection with the Subject Property. During the review of historical records, Stantec attempted to identify uses of the Subject Property from the present to the first developed use of the Subject Property. Stantec's research included the reasonably ascertainable and useful records described in this section.

3.1 Physical Setting

A summary of the physical setting of the Subject Property is provided below.

3.1.1 Subject Property Topography and Surface Water Flow

The Subject Property is located at elevations ranging from approximately 1,335 feet above mean sea level (amsl) (EHPP Area) to 470 feet amsl (11G Staging Area) within the Elk Hills range, a low mountain range on the border between the Coastal Ranges and Great Valley geomorphic provinces. Although the area in which the Subject Property is located is hilly with frequent and substantial variations in elevation, the EHPP Area portion of the Subject Property is comparatively flat with an overall gradient to the north, as shown by the United States Geological Service (USGS) 7.5-minute Topographic Map of the East Elk Hills Quadrangle (USGS, 2021). The 10G and 11G Staging Areas are at lower elevations and, while also generally flat, are located in a region that slopes to the south. Based on the topography of the Subject Property, surface water that does not infiltrate unpaved portions across most of the site is expected to flow to the north in the EHPP Area, and south in the 10G Staging Area and 11G Staging Area.

3.1.2 Regional and Subject Property Geology

The Subject Property overlies the Tulare Formation in the northwest and Lower Tulare Formation in the southeast, both units comprising Pliocene to Pleistocene aged valley alluvial sediments of loosely consolidated pebble, gravel, sand, and clay. The EHPP Area is located southeast of the termination of an antiform structure, with beds dipping shallowly (approximately 1 to 2 degrees) to the northeast, east, and south. (Dibblee & Minch, 2005a, 2005b). The 10G and 11G Staging Areas are located on and east of southeast-plunging antiform and synform structures, with beds dipping shallowly (approximately 5 degrees) to the north and south.

The online U.S. Department of Agriculture (USDA) Web Soil Survey map shows soils in the Elk Hills Power Plant Area to be comprised of four distinct units. Both the Elk Hills-Torriorthents stratified complex and the Elk Hills-Torriorthents stratified eroded complex consist of gravelly sandy loam at depths ranging from 0 to 49 inches bgs and stratified gravelly sand to silt loam at depths ranging between 49 to 65 inches bgs. Underlying the area around the power plant and parking lots, the Kimberlina sandy loam unit consists of sandy loam at depths between 0 to 45 inches and silt loam and clay loam at depths between

45 to 71 inches bgs. The southernmost portions of the EHPP Area are underlain by the Elk Hills sandy loam unit, which consists of gravelly sandy loam at depths of 0 to 49 inches bgs and gravelly sand to silt loam at depths of 49 to 65 inches bgs (USDA Web Soil survey, 2025).

The 10G Staging Area is mapped as underlain by the Kimberlina urban land complex, and anthropogenic reworking of alluvial fan deposits comprising well-drained sandy loam from 0 to at least 60 inches bgs.

The 11G Staging Area is mapped as underlain by soils of the Kimberlina urban land complex (sandy loam), sodic haplocambids and thin- and thick-torriorthents, composed of alluvial deposits derived from granitic parent material with typical soil profiles of loam from 0 to 18 inches bgs followed by interbedded sandy loam and sandy clay loam to over 60 inches bgs.

3.1.3 Regional and Subject Property Hydrogeology

The Tulare Formation is unsaturated along the central east-west trending crest of Elk Hills (in the vicinity of the EHPP Area) as shown by a shallow groundwater investigation conducted in 2014, which found no evidence of shallow groundwater in the upper Tulare Formation within a depth of 320 feet of the surface (Stantec, 2014 as cited in GSI, 2024). Past the crest, groundwater depths range from 500 feet bgs to 800 feet bgs; however, near the northeast and southeast flanks of Elk Hills, groundwater depths range from 250 to 500 feet bgs (Critique, 2003; Golder, 1991; The Mark Group, 1987 as cited in GSI, 2024). However, depth to an unconfined aquifer according to Department of Water Resources was 165 feet in spring 2023 (SEI 2025).

Based on surface topography, groundwater is expected to flow to the north in the EHPP Area and to flow south in the 10G and 11G Staging Areas; however, site-specific groundwater flow direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.

3.2 Federal, State, and Tribal Environmental Records

A regulatory agency database search report was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the information listed within the database relative to potential impact to the Subject Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Subject Property. As described in Section 3.1.3, Regional and Subject Property Hydrogeology, the inferred shallow groundwater flow direction is likely to be toward the north. Observations about the Subject Property and adjoining properties made during the Subject Property reconnaissance are provided in more detail in Section 4, Site Reconnaissance.

3.2.1 Listings for Subject Property

Listings from the EDR database report associated with the Subject Property address are included below; however, note that all features described below may not be within the Project area or may be mis-mapped by EDR and/or the source databases.

3.2.1.1 Elk Hills Power Plant Area

The EHPP Area portion of the Subject Property was identified in the environmental database report to be associated with the following database listings:

California Resources Elk Hills, LLC: 4026 Skyline Road

- PFAS ECHO: The site is listed in connection with a USEPA's Enforcement and Compliance History Online database (ECHO) facility report; however, no information regarding the presence of per- and polyfluoroalkyl substances (PFAS) at the site was discerned from the report.

Elk Hills Power, LLC / Elk Hills Power Plant: 4026 Skyline Road

- AST: The site is listed under the EPAID CAR000108498 in connection with ASTs. No further details were associated with this listing.
- CERS HAZWASTE: The site (Site ID: 392140), is listed under the descriptions of hazardous waste generator and hazardous waste management in the California Environmental Reporting System (CERS).
- CERS Tanks: Elk Hills Power, LLC (CERS ID: 10235623 and site ID: 392140), is listed in connection with "above ground petroleum storage". No further details were associated with this listing.
- CERS: Compliance evaluation records indicated that inspections of the Elk Hills Power, LLC, property observed no violations. The only notable observations were two administrative recommendations.
- CERS: The EHPP is listed in association with the US EPA Air Emission Inventory System.
- CIWQS: The EHPP (WDID: 5F15I018237) is listed in the California Integrated Water Quality System Project (CIWQS) database in connection industrial stormwater permit, which became effective on July 2, 2003, and terminated on May 7, 2012.
- E Manifest: The Elk Hills Power, LLC (EPA ID: CAR000108498) site is listed in connection to numerous hazardous waste manifests.
- HAZNET: Elk Hills Power, LLC (ID: CAR000108498) is associated with numerous listings for hazardous waste disposal. The materials disposed include other organic solids, unspecified aqueous solutions, waste oil, mixed oil, and off-specification, aged or surplus inorganics.
- HWTS: In a Hazardous Waste Tracking System (HWTS) database listing created in March 2003, Elk Hills Power, LLC (EPA ID: CAR000108498), is listed in connection with "Fossil Fuel Electric Power Generation".

- ICIS: The site is listed in the Integrated Compliance Information System (ICIS) database as having received five formal administrative orders and five informal violation notices related to air quality regulations in Kern County.
- RCRA-SQG: A Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (RCRA-SQG) form dated August 6, 2018, identified the following hazardous materials at the Elk Hills Power, LLC, site: corrosive waste, spent halogenated solvents (including PCE and TCE), spent non-halogenated solvents, and wood preserving waste.
- US AIRS: Elk Hills Power, LLC (Facility Registry ID: 110012191430), is listed in the United States Aerometric Information Retrieval System (US AIRS) database in connection with the State Implementation Plan for National Primary and Secondary Ambient Air Quality Standards with an active status as of October 13, 2015.
- WDS: The Elk Hills Power Plant (Facility ID: 5F 15I018237) is listed in the Waste Discharge System (WDS) database as an active industrial facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including oil production, storage and disposal operations, water pumping. The facility is additionally listed as a minor threat to water quality.

Former Naval Petroleum Reserve: 000 Elk Hills Road and Skyline Road

- CPS-SLIC: A SWRCB GeoTracker Cleanup Program Site (CPS; formerly Spills, Leaks, Investigations and Cleanups [SLIC]) case (Case No: T10000010089) is listed in connection to the site. The GeoTracker case is further discussed in Section 3.3.6, Local/Regional Water Quality Agency Records.

3.2.1.2 10G Staging Area

The 10G Staging Area portion of the Subject Property was identified in the environmental database report to be associated with the following database listings:

EHOFF, 10G Class II-1 Waste Management Complex

- CERS: The Subject Property is listed as a land disposal site.
- CIWQS: The Subject Property is listed as an oil and gas extraction facility, with the site adopted in August 1973, expiring August 2020.

3.2.1.3 11G Staging Area

The 11G Staging portion of the Subject Property was identified in the environmental database report to be associated with the following database listings:

California Resources Elk Hills LLC

- UIC: A listing pertaining to an oil well with American Petroleum Institute (API) number 0402929217.

3.2.2 Listings for Adjoining and Nearby Sites with Potential to Impact Subject Property

Stantec assessed data presented in the environmental agency database search report to evaluate the potential for conditions on adjoining and nearby sites to pose a REC, CREC, or HREC for the Subject Property. The evaluation included an opinion of the potential for contamination by hazardous substances or petroleum products to migrate to the Subject Property from an adjoining or nearby site, including by vapor migration or encroachment (i.e., potential for a vapor encroachment condition [VEC]. ASTM E2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM, 2022) was used as the basis for a Tier I Vapor Encroachment Screen (VES) for the Subject Property. This included evaluation of release sites within 0.1 miles for Petroleum Hydrocarbon releases, and 0.33 miles for VOCs, SVOCs, plus other potential vapor phase contaminants (such as mercury).

Based on this evaluation, the following individual facilities were identified as the most likely potential sources of impact to the Subject Property.

Listed Facility Name/Address	Database Listing(s)	Distance/Direction from Subject Property
<u>Occidental Section 26R Transfer Station</u> T30s, R23E, Section 26-NW, ElkHill/Skyline The Occidental Section 26R Transfer Station (Facility ID: 15-AA-0396), which encompasses 1 acre, is listed as being an active non-disposal, limited volume transfer station. A throughput of approximately 15 tons per day or 3,575 tons per year is transferred through the station. Quarterly inspections are conducted at the facility with construction/demolition, industrial, and other designated waste types being transferred at the facility. The facility is part of the collective REC of the generation and storage of hazardous waste materials, particularly petroleum products, on and around the Subject Property.	SWF/LF	Approximately 510 feet north of the EHPP Area
<u>Former Naval Petroleum Reserve – 27R Waste Management Complex, Elk Hills Oilfield</u> Elk Hills Road and Skyline Road, Section 27, T30S, R23E, MDB&M The Former Naval Petroleum Reserve—27R Waste Management Complex, located in the EHOF in Tupman, California—is an open CPS site undergoing assessment and interim remedial action as of January 19, 2011. The site is comprised of unlined trenches that were used to store hazardous waste. Constituents of potential concern (COPCs) in soil include arsenic, chromium, crude oil, and PAHs. A compliance inspection conducted on March 24, 2011, found no violations. The site's environmental impact is being actively monitored, with regulatory oversight continuing under the Central Valley Regional Water Quality Control Board (CVRWQCB). The 27R Waste Management Complex is considered a REC and VEC because, although engineering controls have been implemented to minimize the ability of COPCs to migrate offsite and into the surrounding area, the case remains open and cleanup monitoring continues to the present day.	CPS-SLIC, CERS	Approximately 625 feet west of the EHPP Area
<u>William Brothers Engineering Company</u>	EnviroStor, CHMIRS, SEMS ARCHIVE	Approximately 690 feet northeast of the EHPP Area

CalCapture CCS Project – Phase I Environmental Site Assessment Report
3 Records Review

Listed Facility Name/Address	Database Listing(s)	Distance/Direction from Subject Property
Naval Hills Petroleum Reserve #1 – Elk Hills The Williams Brothers Engineering Company listing is associated with two releases, including the release of approximately 3,654 gallons of crude oil on January 19, 1997. The leak was caused by a corroded gravity line leak. No cleanup actions were reported. The second release was of approximately 84 gallons of crude oil on March 19, 1997. The leaking pipe was clamped, and the final cleanup occurred several days later. The Williams Brothers Engineering Company site is also identified by Site ID 0902086 and U.S. EPA ID CAD980817720. The site is not listed on the National Priorities List (NPL) and has been classified as "NFRAP" (No Further Remedial Action Planned). Various U.S. EPA actions were taken, including a Preliminary Assessment (PA) completed on August 1, 1980, and another on December 27, 1989. The site was initially discovered on December 1, 1979, and later archived under an action marked "ARCH SITE" on December 27, 1989. U.S. EPA performed all actions related to the site, which has since been archived without further remedial actions planned. While the site was granted an NFA status based on existing information, the site is considered to fall under the collective REC of oil and gas operations conducted on and around the Subject Property. The release of crude oil at the Williams Brothers Engineering Company site is considered a REC due to its proximity to the Subject Property and the quantity of materials released. The release should be recognized as part of the collective REC for spills and releases of petroleum products on and around the Subject Property.		
<u>Wastewater Pits</u>	Wastewater Pits	Approximately 1,020 feet west of the EHPP Area
The 27R Truck Washout Pit and the 27R Triangular Pond (GeoTracker Global ID: L10007804479) are listed at a higher elevation and west of the Subject Property. Both ponds are listed as inactive. The presence of wastewater pits at a higher elevation and west of the Subject Property is considered a REC as any releases would have the ability to migrate downgradient towards the Subject Property.		
<u>NPR #1 42-36S</u> Section 36, T30S, R24E	SWF/LF	Approximately 1,425 feet southeast of the EHPP Area
NPR #1 42-36S is a closed and archived disposal-only site previously owned by Occidental of Elk Hills, Inc. with Facility ID and SWIS Number 15-CR-0093. The site was classified under the Closed/Illegal/Abandoned Category (C3) and was unpermitted at the time of its operation. It falls under the jurisdiction of the County of Kern's Environmental Health Division for both reporting and enforcement, within the San Joaquin Valley Unified Air Pollution Control District, and the CVRWQCB. Although no records were identified to indicate a spill or release occurred at the site with the potential to impact the Subject Property, the site is considered to contribute to the collective REC of oil and gas operations conducted on and around the Subject Property.		

Based on distance, regulatory status, and/or cross- or down-gradient location relative to the Subject Property, RECs were not identified in connection with the remaining listings in the database search report, including listings of Orphan/Unlocated Sites, provided in **Appendix D**.

Stantec notes the presence of multiple facilities that supported the extraction and transportation of petroleum hydrocarbons, and transfer/disposal of their waste and byproducts. While limited evidence of significant releases or spills was noted from review of regulatory information, the potential for multiple unrecorded spills or releases to have occurred from any one of these facilities is considered a collective REC.

3.3 Local/Regional Environmental Records

Stantec checked the following sources to obtain information pertaining to Subject Property use and/or indications of RECs in connection with the Subject Property.

3.3.1 Local Health Department

Agency Name, Contact Information, Date	Finding
Kern County Public Health Services Environmental Health Division Online records request form February 20, 2025, and April 11, 2025	In response to the request submitted by Stantec, the Kern County Public Health Services Environmental Health Division provided numerous documents including hazardous waste generator inspection reports, conducted between 2016 and 2021, which did not identify any violations. CERS database entries show the Elk Hills Power, LLC, facility located at 4026 Skyline Road, Tupman, California, was listed as a hazardous waste generator that owns and operates petroleum-containing ASTs that exceed 1,320 gallons or more. The materials and waste reported include but are not limited to aqueous ammonia, compressed helium, CO₂, lead acid batteries, diala ax oil, various calibration gases, turbine oil, and sulfuric acid. <i>A Risk Management Plan for Aqueous Ammonia Storage and Use</i> prepared by AECOM in 2008 for the EHPP was also provided. The plan describes the aqueous ammonia lifecycle at the site, which includes delivery of between 5,000 to 6,000 gallons of aqueous ammonia every 9 days. The total capacity of aqueous ammonia able to be stored onsite is 24,000 gallons in two horizontal steel tanks. Both tanks were set within secondary containment capable of holding 150 percent of the total volume of the tanks. Inspection reports provided for the 11G Staging Area property address of 28590 Highway 19 included violations for failure to properly label hazardous waste (2019), failure to properly manage used oil and fuel filters (2015, 2019), active leak(s) observed (2015), failure to contact the Certified Unified Program Agency (CUPA) on the day of a discovered release (2015), and improper disposal of hazardous waste (2014).

3.3.2 Fire Department

Agency Name, Contact Information, Date	Finding
Kern County Fire Department Online records request form February 20, 2025, and April 11, 2025	In response to Stantec's February 20, 2025, records request, the Kern County Fire Department sent an email on February 21, 2025, in which they indicated that they do not have records responsive to Stantec's request. In response to Stantec's April 11, 2025, records request, the Kern County Fire Department indicated that they did possess records

Agency Name, Contact Information, Date	Finding
	pertinent to the request; however, as of the authoring of this report, those records had not been provided to Stantec. Pursuant to the ASTM standard, this information is considered not readily available.

3.3.3 Local Building and/or Planning Department Records

Agency Name, Contact Information, Date	Findings
Kern County Public Works Online records request form February 20, 2025, and April 11, 2025	In response to Stantec's records requests, Kern County Public Works provided numerous documents, which detail various construction projects and permit records for 4026 Skyline Road, Tupman, California, primarily related to the development of the EHPP. Between 2001 and 2003, permits were issued for several structures, including a new control building at the switchyard, a maintenance and warehouse building, temporary office trailers, and electrical installations to support construction activities. A single-wide commercial coach was also installed as an accessory structure to the power facility. Electrical and mechanical systems were a significant part of the development, with temporary electrical setups for construction trailers and permanent electrical buildings to support plant operations. The documents also include inspection records verifying compliance with building regulations, covering elements such as foundation work, plumbing, electrical grounding, and mechanical installations. Certificates of occupancy were granted upon completion, indicating the structures met the necessary safety and zoning requirements. A maintenance warehouse was constructed to support ongoing plant operations, while temporary office spaces facilitated on-site project management. Records pertaining to the 10G and 11G Staging Areas include Public Works inspection records for projects including construction of foundations, tanks, water lines, temporary offices, compressor stations, and platforms. Due to the attribution for records across the wider oilfield to the street address of 28590 Highway 119, Stantec is unable to confirm which records pertain to structures on the Subject Property.

3.3.4 National Pipeline Mapping System – Public Viewer

The National Pipeline Mapping System – Public Viewer was accessed by Eli Hill of Stantec on February 27, 2025, and (for the 10G and 11G staging areas) Tom Stanley of Stantec on April 11, 2025. According to the Public Viewer, three currently active, buried pipelines are located on or near to the Subject Property and are operated by California Resources Elk Hills (operator ID: 31228).

- The Elk Hills 16in East Sales Gas natural gas pipeline (pipeline ID: 182535).

- The Elk Hills 4in butane pipeline (pipeline ID: 1301).
- The Elk hills 20in West Sales Gas pipeline (pipeline ID: 150700).

In addition, two pipelines were noted near to the 10G Staging Area and 11G Staging portions of the Subject Property:

- The Line 065 crude oil pipeline, operated by Plains Pipeline, L.P. (pipeline ID: 13927)
- The TOSCO 8in & 12in oil pipeline, operated by Phillips 66 Pipeline LLC (pipeline ID: NC13_2219_687)

No accidents or incidents were mapped within a 1-mile radius of the Subject Property.

3.3.5 Local/Regional Pollution Control Agency Department Records

Agency Name, Contact Information, Date	Findings
DTSC EnviroStor Online Database February 25, 2025	The hazardous waste area located approximately 3,600 feet northwest of the Project is associated with a post closure permit (permit no. CA4170024414) intended to cover the 27R waste management unit (WMU). The 27R WMU previously received neutralized well stimulation fluids and tank bottom sludge into five unlined trenches between 1975 and 1985. The total volume of waste contained within the WMU is estimated to be 1,470,756 gallons of tank bottom sludge and 927,780 gallons of neutralized well stimulation fluids. The WMU was capped with approximately 5 to 10 feet of clean soil, a 2-foot-thick clay layer placed above the clean soil, and an approximately 1.5-foot-thick vegetative soil layer above the clay. In 1990, a boring was drilled near the 27R WMU to a depth of 1,000 feet. Groundwater was not encountered. The 27R WMU is not considered a REC because, although the site contains an estimated 2.5 million gallons of hazardous waste, the site has had engineering controls implemented in the form of a low-permeability cap, and no further action (aside from post-closure monitoring) is likely to be granted by the DTSC. Groundwater was not encountered up to depths of 1,000 feet bgs, so groundwater impacts (if any) are unlikely to be encountered during construction of the proposed Project. Volatile COPCs are unlikely to laterally migrate through soil pore spaces to encroach upon the Subject Property, given the distance to the Project. The 10G Staging Area portion of the Subject Property is associated with EnviroStor case no. 80001254 <i>Occidental of Elk Hills Inc.</i>, referred to as AOC-030-003. The AOC-030-003 was used for disposal of well drilling waste material and encompassed approximately 19.5 acres. Arsenic is listed as the constituent of concern. Documents associated with the case indicate approximately 50,350 cubic yards of impacted soil require removal and proper disposal.

Agency Name, Contact Information, Date	Findings
	In addition, LUC documents attached to case no. 80001254 report all three sections of the Subject Property project area to be encompassed by a <i>Declaration of Covenants, Conditions, and Environmental Restrictions</i> dated February 5, 1998, during the sale of parcels of land (referred to as “Federal Sites”) from the U.S. Department of Energy (DOE) to Occidental of Elk Hills. The LUC prohibits sensitive land uses including the construction of permanent or temporary lodging, hospitals and healthcare facilities, schools, daycare centers, parks, and playgrounds, or other use that could require the DOE to complete additional remediation to make the parcels suitable for anything other than ongoing use, or could materially enhance the risks of human exposure to environmental impacts. No other LUCs specifically pertaining to AOCs 092 or 030-003 were identified attached to this case.

3.3.6 Local/Regional Water Quality Agency Records

Agency Name, Contact Information, Date	Findings
SWRCB GeoTracker Online Database February 25, 2025	A search of the SWRCB GeoTracker database identified two environmental cases on the Subject Property and one environmental case west of the Subject Property. <u>T10000010089 - Former Naval Petroleum Reserve No.1 Closure Project (Elk Hills)</u> Status: “Open – Assessment and Interim Remedial Action” as of March 1, 2018. The site is currently under the regulatory purview of the DTSC, which is assisted by the CVRWQCB in closing approximately 55 sumps that are listed under several waste discharge requirements (WDRs). The Project’s goal is to close any sumps listed under the WDR and ultimately rescind the WDRs. Any active sumps remaining will be relegated under new, updated WDRs. In addition, the CVRWQCB is assisting the DTSC in closing AOCs across the Former Naval Petroleum Reserve that have waste discharge requirements. While the footprint of the Project and temporary workspaces overlaps with AOCs 092 and 030-003, only documents pertaining to AOC-030-003 were identified associated with this case. A summary of a report entitled <i>RFI Implementation Report – Remedy Selection and Statement of Bias</i> (RFI IR-RSSB) (report prepared and submitted by Paragon Professional Services, LLC, on behalf of the DOE, dated June 28, 2024) prepared by the CVRWQCB was reviewed by Stantec (CVRWQCB, 2024). The report pertains to the 10G Staging Area portion of the Subject Property, which is referred to as AOC-030-003 and comprises two areas: the 10G Land Farm

Agency Name, Contact Information, Date	Findings
	and the associated Land Farm Drainage Area. AOC-030-003 was historically used for the disposal of well drilling waste material and was reportedly regulated under WDR Order No. 73-042 since 1976. The summary of the RFI IR-RSSB indicates that arsenic was identified as a COC in the AOC, recorded at concentrations exceeding the commercial/industrial cleanup goal (listed as 26 milligrams per kilogram [mg/kg]). The purpose of the corrective measures was to achieve removal action objectives (RAOs) by remediating arsenic-impacted soil to commercial/industrial cleanup goals from the surface to 5 feet bgs and providing a clean soil cover. Corrective measures included excavation, stockpiling, testing, and disposal of soil with arsenic at concentrations exceeding the cleanup goal. This was completed to depths of between 2 and 4 feet bgs within the 10G Land Farm area, with no soil excavated in the Land Farm Drainage Area. The excavation was then backfilled to match surrounding grade using clean imported fill. A residual risk evaluation was completed based on historical and recent soil sampling results. The report states that the cancer residual risk for all screened and streamlined risk results is within the acceptable risk management range (1E-06 to 1E-04) or is less than the point of departure for risk management decisions (1E-06). The residential noncancer Hazard Index (HI) is greater than 1 at both the 10G Land Farm and Land Farm Drainage Area for all evaluated soil depth intervals, and the commercial/industrial HIs are equal to or less than 1 for all evaluated depth intervals, except for the Land Farm Drainage Area which has a HI of 2 for the streamlined risk evaluation at the 0-11.5 feet bgs depth interval. A HI greater than 1 indicates the potential for adverse noncancer health impacts. Arsenic concentrations exceeding the commercial/industrial cleanup goal in the 0 to 5 feet bgs interval were removed, and soils with arsenic concentrations exceeding the cleanup goal at depths greater than 5 feet bgs are to be managed using institutional controls. Furthermore, the report states that groundwater is not considered a media of concern for risk to human health because the depth to groundwater is estimated to be approximately 300 feet bgs and the area is characterized by poor groundwater quality, low precipitation rates, a high rate of evaporation, and low leaching potential. Based on data evaluation of the arsenic confirmation samples and results of the residual risk evaluation, the report states that the RAOs were met. In conclusion, the report recommended NFA for AOC-030-003. The summary of this report by the CVRWQCB includes a staff comment that tentatively concurs with the recommendation for NFA, given no threat to water quality was identified; however, the final concurrence for NFA was deferred to the DTSC based on its review of mitigation of threat to human health. In the absence of an NFA destination issued for AOC-030-003, the presence of concentrations of arsenic at concentrations exceeding commercial/industrial cleanup goals is considered a CREC that may

Agency Name, Contact Information, Date	Findings
	be downgraded to an HREC upon issuance of a notice of NFA and case closure for this AOC. <u>T10000016467 - California Resources Corporation - Elk Hills Oilfield – Section 35R</u> Status: “Open – Site Assessment” as of March 10, 2022 A site assessment is currently ongoing with the primary focus being the identification of PFAS stemming from historical fire suppression systems located at the site. In a report dated March 11, 2024, GSI Environmental detailed the findings of a PFAS investigation conducted at the site. In 2022 and 2023, 170 samples were collected for PFAS analysis, and one or more PFAS compounds were detected in 135 of the soil samples analyzed. By modifying published regulatory screening levels into site-specific screening levels (based upon a lower exposure rate), just one sample location was identified as containing PFAS compounds that exceeded the modified screening levels. GSI Environmental proposed that limited remediation of the soils in and around the sample location B52 (southeast of the proposed CO₂ pipeline to 35R Manifold/Pad, adjacent to fire monitors connected to aqueous film-forming foam [AFFF] containers) would be required to reduce PFAS soil concentrations to reduce exposure cancer risks to below the 1 in 1,000,000 unacceptable risk level, and non-cancer risks to below a hazard quotient of 1.0. GSI Environmental concluded that the evaluation demonstrates minimal remediation would be needed to reduce PFAS health risks for workers at the Site to acceptable levels and stated that CRC will prepare a “soil removal plan to address PFAS-impacted soil in the vicinity of sample location B52” (GSI, 2024). <u>T10000002777 - Former Naval Petroleum Reserve – 27R Waste Management Complex Elk Hills Oilfield</u> Status: “Open – Assessment and Interim Remedial Action” as of January 19, 2011. The site is listed in connection to arsenic, chromium, crude oil, and PAHs as potential contaminants of concern. The 27R Waste Management Complex was inspected in March 2011, for compliance with the WDR Order 73-042. The inspection found no evidence of violations at the time. <i>An RFI Implementation Report Interim Measures/Removal Action Work Plan (IM/RAW)</i> published by Paragon on January 12, 2024, was provided within the listing. The remediation efforts focused on addressing soil and soil vapor contamination caused by historical drilling mud disposal. The primary remedial activities involved the installation and operation of a soil vapor extraction (SVE) system, which was in operation from February 2019 to May 2023. Soil gas and soil sampling were conducted throughout the remediation process to monitor levels of VOCs, metals, and PAHs. The results

Agency Name, Contact Information, Date	Findings
	confirmed that VOC concentrations in soil gas had been successfully reduced to levels that met RAOs established by the IM/RAW. Following the remediation, confirmation sampling and rebound testing were performed to ensure that contaminant levels remained below regulatory thresholds. The DTSC approved the decommissioning of the SVE system in 2023, and the DOE recommended NFA (Paragon, 2024).

3.3.7 Federal/State/Local Natural Resource Records

Agency Name, Contact Information, Date	Findings
California Geological Energy Management Division (CalGEM) WellFinder Online Database February 25, 2025	A search of the CalGEM Well Finder application identified approximately 803 active wells, 292 idle wells, and 234 plugged wells on or within a 1-mile radius of the various areas that comprise the Subject Property: a total of 1,329 wells. Of those, 870 are located on or within a 1-mile radius of the EHPP Area, and 459 are located on or within a 1-mile radius of the 10G Staging Area and the 11G Staging Area. The presence of active, idle, and plugged wells on or adjacent to the Subject Property represent potential sources of soil and soil vapor impacts via the accidental release or intentional discharge of crude oil to soil, and lateral migration of volatile constituents and/or gases (e.g., methane, hydrogen sulfide) via soil vapor. The presence of these wells is collectively a REC and potential VEC. The location of active, idle, and plugged wells on the Subject Property, and within a 1-mile radius, is shown on Figures 3a and 3b.

3.3.8 Military Records

Agency Name, Contact Information, Date	Findings
United States Army Corps of Engineers Formerly Used Defense Sites (FUDS) Online database Date of access: February 22, 2025	A search of the FUDS database did not identify any listings on the Subject Property or within a 1-mile radius.

3.4 Historical Records Review

3.4.1 Land Title Records/Deeds

Stantec obtained an environmental lien and AUL search report for the Subject Property from EDR. A copy of the environmental lien and AUL search report is provided in **Appendix E**.

According to the environmental lien and AUL report, The United States of America attached an AUL to the Subject Property on February 2, 1998. The AUL is related to historical presence of hazardous substances that were stored, released, or disposed of upon portions of the Subject Property denoted as the “Federal Sites”. As part of the AUL report, the United States Government, acting as the seller, warrants that all necessary remedial action has been completed within the two closed federal sites, and it is the seller’s responsibility to perform any further remediation should it be required. Furthermore, the seller reserves an easement over the property for access to conduct remedial and corrective actions and the easement shall remain in place until such actions are complete. No other land title records were reviewed by Stantec as part of this assessment.

3.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs provided by EDR. The general type of activity on a property and land use changes can often be discerned from the type and layout of structures visible in the photographs. However, specific elements of a facility’s operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec’s observations of the reviewed historical aerial photographs. Copies of the historical aerial photographs are provided in **Appendix E**.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1937 1942 1952 1956	1"=500'	In the 1937 aerial image that provides partial coverage of the EHPP Area portion of the Subject Property, the area around the proposed substation location north of the Capture Facility footprint is vacant and predominantly unimproved except for several roads and an oil derrick. In 1942, a collection of ASTs and at least one oil derrick can be seen neighboring the proposed Overflow Parking Area to the east. An oil derrick can be seen in the area of the proposed Primary Parking Area. The 10G and 11G staging areas are undeveloped and unimproved, though a road is present adjacent to the northeast of the 11G Staging Area. By 1952, a facility can be observed on the proposed Capture Facility footprint and east of the proposed CWR route, including where the current day EHPP is located. Additional tanks can be observed west of the proposed CO₂ pipeline to 35R Manifold/Pad route and east of the proposed substation location.
1967 1968 1973 1976	1"=500'	By 1967, the area surrounding the EHPP Area portion of the Subject Property was extensively developed with well pads to support oil and gas extraction operations. The 1968 photography shows the 10G and 11G staging areas to have undergone some grading activity. No significant changes were observed through 1976.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1978 1984 1994 2005 2009	1"=500'	By 1978, the office building had been constructed adjacent to the 11G Staging Area. The 10G Staging Area portion remained unimproved. In the 1984 aerial imagery, the EHPP Area portion of the Subject Property can be seen to be developed in its approximate current configuration. Wastewater pits (or mudlanes) can be observed approximately 0.75 miles northwest of the Project. The present-day emergency storage tank farm can be seen east of the proposed pipeline to 35R Manifold/Pad. The 27R WMU can be observed approximately 0.7 miles west of the Project footprint. The present-day southern substation can be observed west of the proposed PPLN to 35R Manifold/Pad route. The 10G Staging Area portion was also graded and excavated into the approximate current configuration with retention ponds in an approximately north-south orientation. Additional oil and gas extraction and processing infrastructure was constructed in the vicinity of the Elk Hills Power Plant Area between 1984 and 1994. The 27R WMU can be observed to be capped by 1994. Further construction of parking lots and ancillary buildings was completed in the vicinity of the 11G Staging Area portion of the Subject Property. The present-day EHPP can be observed in 2005 along with additional oil and gas extraction and processing infrastructure. The proposed Overflow Parking Area can be seen to support structures. No significant changes were observed in 2009.
2012 2016 2020	1"=500'	By 2012, the present-day northern substation can be observed along the proposed 115KV CC HP West route. The present-day primary oil and gas processing facility was constructed between 2009 and 2012. No further significant changes were observed through 2020.

The use of the Subject Property and surrounding area as an oilfield with ancillary processing facilities since at least 1937 is collectively considered a REC, given the potential for historical reported and unreported, large- and small-scale releases to have occurred and the potential for future releases to occur.

3.4.3 City Directories

Stantec retained EDR to research available city directories for the Subject Property and adjoining and nearby properties, in approximately 5-year intervals. Copies of the city directory listings are provided in **Appendix E**.

The following is a summary of Stantec's review of the city directory listings:

Subject/Adjoining Properties	Year	Listed Occupants
11G Staging Portion of the Subject Property:	1990, 1992	Bechtel Petroleum Inc.
	2000	Occidental Elk Hills Incorporated
28590 119 Highway, and other	2014	KVS Transportation, Inc., Occidental
119 Highway addresses	2017	KVS Transportation, Inc.

Subject/Adjoining Properties	Year	Listed Occupants
	2020	CRC Services

Name of city directories and source: The EDR City Directory Image Report.

The operation of petroleum businesses at the Subject Property since at least 1990 has been a potential source of impacts and is considered a REC.

3.4.4 Historical Fire Insurance Maps

Fire insurance maps were developed for use by insurance companies to depict facilities, properties, and their uses for many locations throughout the United States. These maps provide information on the history of prior land use and are useful in assessing whether there may be potential environmental contamination on or near the Subject Property. These maps, which have been periodically updated since the late 19th century, often provide valuable insight into historical Subject Property and adjoining and nearby property uses.

Stantec requested fire insurance maps from EDR; however, no coverage exists for the Subject Property. The Sanborn® Map Search Report indicating “no coverage” is presented in **Appendix E**.

3.4.5 Historical Topographic Maps

Stantec reviewed historical topographic maps provided by EDR of the East Elk Hills, California quadrangle (1:24,000 and 1:31,680), the Buttonwillow, California quadrangle (1:62,500), and the Buena Vista Lake, California quadrangle (1:125,000) to help identify past Subject Property and adjoining and nearby property usage and areas of potential environmental concern. Copies of the historical maps are provided in **Appendix E**.

The following table summarizes the maps reviewed and our observations.

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1910	1:125,000	In the 1910 topographic map of the Buena Vista quadrangle, two unpaved roads can be seen traveling through the EHPP Area portion of the Subject Property. The southern portions (10G and 11G staging areas) are undeveloped, with an unpaved road to the east trending south. The Subject Property is not mapped as supporting any structures or discernable development. No changes are observed in maps from 1912 or 1929.
1912	1:125,000	
1929	1:31,680	
1932	1:31,680	In the 1932 map of the East Elk Hills quadrangle, numerous additional roads can be observed traveling through the Subject Property and the surrounding area. Multiple tanks can be observed east of the proposed Overflow Parking Area. By 1950, a pipeline was constructed that routes northeast between the 10G and 11G Staging Areas of the Subject Property, approximately 700 feet northwest of the portion at its closest point.
1933	1:31,680	
1942	1:62,500	
1944	1:31,680	
1947	1:25,000	
1950	1:24,000	

CalCapture CCS Project – Phase I Environmental Site Assessment Report
3 Records Review

Year	Scale	Observations of Subject Property and Adjoining/Nearby Properties
1954	1:24,000	In the 1954 topographic map, the area north of the Project area is labeled as the 35-R Gas Plant. Numerous ASTs and oil wells can be observed both on the Subject Property and in the surrounding area with seven tanks and two wells neighboring the Project area. An additional six tanks can be observed east of the proposed 250x250 Sub Location. By 1968, the access roads spurring off the main driveway providing access to the 11G Staging Area were built, though no buildings or structures were mapped. No significant changes are observed in 1973.
1968	1:24,000	
1973	1:24,000	
2012	1:24,000	Additional roads were constructed between 2012 and 2021; however, the previously observed oil tanks and wells are no longer visible in the maps reviewed, due to changes in mapping style. No significant changes were observed on the Subject Property or in the surrounding area.
2015	1:24,000	
2018	1:24,000	
2021	1:24,000	

The development of the Subject Property and the surrounding area as an oil and gas extraction field, visible in topographic maps as early as 1932, is considered a REC as oil and gas operations are often associated with the release of hazardous materials and petroleum products.

4 Site Reconnaissance

A site reconnaissance of the EHPP Area portion of the Subject Property and its vicinity was conducted by Eli Hill of Stantec on February 21, 2025. Access to the Subject Property was provided by Ryan Sexton of CRC. Stantec was accompanied by Ryan Sexton during the site reconnaissance. A second site reconnaissance visit of the 10G and 11G staging areas was completed by Eli Hill on April 23, 2025. Eli Hill was unaccompanied during this second visit. Figures 2a and 2b provide information about the Subject Property and adjoining sites and the location of potential areas of environmental concern. Photographs collected during the site reconnaissance visits are included in **Appendix A**.

4.1 Site Reconnaissance Methodology

The site reconnaissance focused on observation of current conditions and observable indications of past uses and conditions of the Subject Property that may indicate the presence of RECs. The site reconnaissance of the Subject Property was conducted on foot and Stantec utilized the following methodology to observe the Subject Property:

- Traverse the outer Subject Property boundary
- Traverse transects across the Subject Property
- Traverse the periphery of structures on the Subject Property

Given the large acreage and relatively uniform use of the Subject Property, the methodology described in ASTM E2247-23 was utilized in place of the E1527-21 standard. Weather conditions during the site reconnaissance of the Subject Property were clear and sunny. There were no weather-related Subject Property access restrictions encountered during the reconnaissance visit.

4.2 General Description

Observations	Description
Subject Property and Area Description:	The Subject Property is located within Elk Hills, a low laying mountain range that borders the San Joaquin Valley to the east. Both the Subject Property and the surrounding area are extensively developed to support oil and gas extraction. The EHPP Area is accessed by two main roads, Skyline Road and Elk Hills Road, which intersect at the entrance to the Subject Property. The 11G Staging Area is developed for use as a parking lot intended to support the nearby administrative buildings. The 10G Staging Area is a vacant parcel of land that formerly supported mudlanes and is now used for stockpiling materials such as soil and concrete debris as well as staging roll-on/roll-off waste bins. Both the 10G and 11G staging areas are accessed by Highway 119.

Observations	Description
Subject Property Operations:	The Subject Property is developed to support oil and gas extraction and processing operations. Oil and gas are extracted from the EHPP Area and the surrounding area prior to being transported via pipelines to the oil and gas processing facility located on the EHPP Area. Once at the processing facility, crude oil is separated from natural gas products and stored in large capacity holding tanks prior to being transported for sale or further refinement. Large capacity emergency storage tanks are located along the southern boundary of the EHPP Area and are intended to be used to store butane, propane, gasoline, and refrigerant products if the storage tanks at the processing plant become compromised. Most of the processed products are transported offsite via pipeline. A power plant located onsite provides energy to the oil and gas extraction and processing facilities and utilizes natural gases extracted from the oilfield. The 11G Staging Area consists of two vacant mobile trailers formerly used as office spaces and a parking lot used to support the nearby administrative buildings. The 10G Staging Area consists of vacant land that formerly supported several mudlanes. The 10G Staging Area is now used to store stockpiles of various materials such as soils and concrete debris as well as waste bins, all but one of which were empty at the time that the site reconnaissance was completed.
Structures, Roads, Other Improvements:	The Subject Property is developed with dirt, gravel, and asphalt-paved roads used to access onsite facilities and structures. Well pads and other unpaved areas are kept clear of brush through manual clearing and the application of herbicides as a method of pre-emergent weed abatement. Several asphalt-paved parking lots are located throughout the EHPP Area, with the two largest parking lots located south of Skyline Road near the entrance to the Subject Property. Two sumps, one south of the oil and gas processing facility and one south of the emergency storage tanks, were constructed to catch stormwater and any releases of products. The oil and gas processing facility located south of Skyline Road was developed to replace two historical oil and gas processing facilities that were located north of the current facility. Two electrical substations are located on the EHPP Area: one to the east of the oil and gas processing facility and one to the northwest of the power plant. Multiple offices and facility control buildings are located throughout the Subject Property for use by operations and maintenance personnel. A 550-MWe power plant is located on the EHPP Area, northwest of the intersection of Elk Hills Road and Skyline Road. The power plant utilizes natural gas sourced from on-site hydrocarbon extraction, supplemented by SoCalGas as needed, to power on-site buildings and infrastructure. Twenty large capacity emergency storage tanks are located along the southern boundary of the EHPP Area and are intended to store butane, propane, gasoline, and refrigerants in the event that the main holding tanks, located at the processing facility to the west, are compromised. The 11G Staging Area is developed with a large asphalt paved parking lot which supports the nearby administrative buildings. Two mobile office trailers

CalCapture CCS Project – Phase I Environmental Site Assessment Report
4 Site Reconnaissance

Observations	Description
	are located within the 10G Staging Area, with several additional trailers bordering the 11G Staging Area to the east. The trailers located on the 11G Staging Area, as well as those bordering it, were vacant at the time that site reconnaissance was conducted. The 10G Staging Area is vacant and appears to support no operations other than the stockpiling of materials such as soil and concrete debris and the staging of roll-on/roll-off waste bins.
Subject Property Size (acres):	EHPP Area: Approximately 20.7 acres and 3.3 miles of proposed linear features (CO₂ pipelines, water lines, electrical cables or conduits). 10G Staging Area: Approximately 15.8 acres 11G Staging Area: Approximately 3.2 acres
Estimated % of Subject Property Covered by Buildings and/or Pavement:	Approximately 30%
Observed Current Subject Property Use/Operations:	The EHPP Area is currently used to support oil and gas extraction and processing operations. The 11G Staging Area is currently used as a parking lot to support the nearby administrative buildings. The 10G Staging Area is currently vacant and supports no operations other than the stockpiling of soil and concrete as well as the staging of roll-on/roll-off waste bins.
Observed Evidence of Past Subject Property Use(s):	The Subject Property has operated as an oil field for over 100 years. Due to economic feasibility, historical oil and gas processing facilities that are no longer used have been abandoned in place. An abandoned truck weigh station was observed on the EHPP Area, which was reportedly used when export of hydrocarbon products was via overground trucking rather than through pipelines, which is the current export method. The 11G Staging Area showed signs of previously operating as office or administrative buildings; however, those buildings are now unoccupied. The 10G Staging Area showed evidence in the form of signage and grading that it formerly operated as a landfarm in which mudlanes were used to dispose of soil cuttings generated during drilling operations. Building foundations and electrical connections were observed within the Temporary Parking, Office, and Staging Areas located north of Skyline Road. The former use of these buildings could not be inferred.
Sewage Disposal Method (and age):	Onsite facilities are tied into one of several septic systems located throughout the EHPP Area.

Observations	Description
	The 11G Staging Area showed evidence of being connected to a sanitary sewer system in the form of manhole covers located immediately east of the staging area No sewage system was observed on the 10G Staging Area.
Potable Water Source:	The Subject Property is supplied with potable water through the West Kern Water District.
Electric and Natural Gas Utilities:	The Subject Property is typically supplied power through a self-maintained power generation and over-head distribution system; however, if the power plant is unable to generate energy, the Subject Property will switch to pulling power from the local Pacific Gas & Electric Company grid, which it is tied into.

4.3 Hazardous Substances and Petroleum Products

The following table summarizes Stantec's observations during the Subject Property reconnaissance.

Observations	Description/Location
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14) with identified uses:	Stantec observed the following hazardous substances and petroleum products at each portion of the proposed Project area: Proposed Electrical Line 115KV CC HP West: Stantec observed nine 55-gallon drums and one approximately 1,000-gallon AST containing HDAX 5200 low-ash engine oil SAE 40, one slug catcher AST containing heavy hydrocarbons, and two ASTs containing oily water along the proposed 115KV CC HP West route. The HDAX 5200 low-ash engine oil is used for four-stroke and selected two-stroke stationary engines fueled by natural gas. The AST containing heavy hydrocarbons acts as a "slug catcher" which is used to separate and eliminate slugs (a buildup of gas or liquid that flows through the pipeline) from the primary pipeline flow. Proposed CO₂ Line PPLN to 35R Manifold Pad: Stantec observed a drum containing WCW4511X corrosion inhibitor next to a pumpjack located along the proposed CO₂ line route. Stantec observed two drums containing GST 32 oil and two drums containing lubricant oils east of the proposed route. The oil products contained within the drums are used for servicing pumps which aid in transporting various products. A plastic tote containing FM200 fire suppression foam was observed by Stantec southeast of the proposed route. CalCapture Facility Footprint: Stantec observed a slug catcher tank containing heavy hydrocarbons along the northern boundary of the Project area. The AST containing heavy hydrocarbons acts as a "slug catcher" that is used to separate and eliminate slugs (a buildup

Observations	Description/Location
	of gas or liquid that flows through the pipeline) from the primary pipeline flow. Overflow Parking Area East of Elk Hills Road: Stantec observed a 6,048-gallon AST containing diesel fuel within the overflow parking area. Field Offices Parking Area South of Skyline Road: Several ASTs containing various lubricating oils and automotive fluids such as HDAX low-ash engine oil, GST 100 oil, and HDAX antifreeze/coolant were observed along the northern border of the proposed field office area. Numerous pipelines containing various materials including petroleum products intersect throughout the Subject Property and either run through or in close proximity to the proposed Project area.
Drums/Totes/Intermediate Bulk Containers (≥ 5 gallons):	Stantec observed the following drum, tote, and intermediate bulk container (IBC) products: Proposed Electrical Line 115KV CC HP West: Stantec observed nine 55-gallon drums containing HDAX 5200 low-ash engine oil SAE 40 along the proposed electrical line route. Proposed CO₂ Line PPLN to 35R Manifold Pad: Stantec observed a drum containing WCW4511X corrosion inhibitor next to a pumpjack located along the proposed CO₂ line route. Stantec observed two drums containing GST 32 oil and two drums containing lubricant oils along east of the proposed route. A plastic tote containing FM200 fire suppression foam was observed by Stantec southeast of the proposed route. 26R Warehouse W/HVAC: Four drums, one containing oily rags, one containing used lead batteries and two containing spent aerosol cans were observed outside the western wall of the warehouse building.
Strong, Pungent, or Noxious Odors:	A strong hydrocarbon odor was noted south of the Vac Truck wash rack.
Pools of Liquid:	A pool of liquid was observed beneath a roll-on/roll-off waste bin containing oily water and soils, located at the 10G Staging Area. The location of the bin is shown on Figure 2b.
Unidentified Substance Containers:	Three unlabeled approximately 300-gallon IBCs and an unlabeled 55-gallon drum were observed northwest of the Project. Both the IBCs and the drum were located on secondary containment and did not have evidence to suggest leaking or a release.

Observations	Description/Location
Polychlorinated biphenyl (PCB)-Containing Equipment:	Proposed CO₂ Line PPLN to 35R Manifold/Pad: Stantec observed a pole-mounted single transformer and two pole-mounted triple transformers along the proposed CO₂ line route. None of the observed transformers appeared to be leaking. A substation was observed adjacent to the west of the proposed route. A pole-mounted single transformer and a pole-mounted triple transformer were observed east of the proposed route. The single transformer appeared to be leaking oil from its base. Site Offices: One pole-mounted single transformer and two pole-mounted triple transformers were observed west of the proposed Site Offices. None of the observed transformers appeared to be leaking. Proposed Electrical Line 115KV CC HP West: A substation was observed east of the proposed route.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	None observed.

4.4 Interior Observations

Two permanent structures are located within the EHPP Area, a currently unused truck scale station and a warehouse. The truck scale station was locked and unable to be viewed; however, exterior observations indicated that the structure consisted of an office-style room and an electrical room, which were used in conjunction with the adjacent truck scales to facilitate product transportation. The warehouse located south of Skyline Road was able to be viewed and was observed to contain various parts and equipment used to maintain oil and gas infrastructure. No hazardous materials or notable operations were observed within the warehouse.

Buildings neighboring the Subject Property boundaries were primarily operations and maintenance structures, office buildings, and a control room for the power plant.

The 11G Staging Area currently supports two semi-permanent office trailers; however, these trailers were unoccupied during the site reconnaissance.

4.5 Exterior Observations

Stantec made the following observations during the site reconnaissance of exterior areas of the Subject Property and/or identified the following information during the interview or records review portions of the assessment.

Observations	Description
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	Several areas of staining were observed throughout the Subject Property, including an approximately 8-foot by 5-foot stain of suspected GST 32 oil and a 3-foot by 2-foot stain stemming from a leaking pump east of the proposed CO₂ Line PPLN to 35R Manifold/Pad. An approximately 3-foot by 3-foot stain was observed within an electrical equipment laydown yard located east of the proposed CO₂ Line route. Staining was observed around a drum collection area containing nine drums and one approximately 1,000-gallon tank of HDAX 5200 low ash engine oil SAE 40. Several stains measuring approximately 8 feet by 8 feet were observed within the Project footprint. A stain measuring approximately 35 feet by 25 feet was observed to be stemming from the several ASTs containing various lubricating oils and automotive fluids located along the northern boundary of the Field Offices project area, south of the Project footprint.
Stressed Vegetation:	Distressed non-native and ruderal vegetation was noted within the Project area, in areas such as well pads, maintenance yards, pipeline routes, and material storage areas. Stantec understands that herbicides are regularly applied in a pre-emergent fashion to keep areas of operations free from vegetation, once cleared via manual or mechanical methods.
Waste Streams and Waste Collection Areas:	Several municipal waste bins were observed around the EHPP Area including near the control center, the main parking lot, and the Vac Truck wash rack. Two roll-on/roll-off bins of green waste generated during brush removal activities were observed at the southern end of the proposed CO₂ Line PPLN to 35R Manifold Pipeline route. Two roll-on/roll-off bins containing petroleum saturated soils were observed northwest of the Project. Six roll-on/roll-off bins were observed along the eastern boundary of the 10G Staging Area. While most of the bins observed were empty, one of the bins was noted to contain oily water and soil. Pools of liquid were observed beneath each end of this bin. Three municipal waste bins were observed in the 11G Staging area.

CalCapture CCS Project – Phase I Environmental Site Assessment Report
4 Site Reconnaissance

Observations	Description
Solid Waste Disposal:	A fenced off mound, capped with soil and measuring approximately 590 feet at its longest, was observed approximately 3,600 feet west of the Project. The mound was marked with signs reading "Hazardous Waste Area" along its fence line. No indications to suggest what materials were contained within the mound were observed; however, the mound was seen to support vegetation.
Potential Areas of Fill Placement:	The 10G Staging Area showed evidence of the former mudlanes being filled in as they were largely at surface level with only minor depressions being noticed.
Wastewater:	Wastewater generated by the cooling system for the power plant was observed to be collected beneath the cooling system and then conveyed into infiltration wells.
Stormwater:	Stormwater on the EHPP Area is likely transported via overland flow to the north. Stormwater on neighboring properties to the east and to the west (where the hazardous waste area and wastewater pits are located) flow down gradient, towards the EHPP Area. Stormwater at the 10G and 11G Staging Areas likely transported to the southeast. Stormwater from neighboring properties to the north and west likely flow downgradient towards the staging areas.
Wells:	Numerous hydrocarbon extraction wells and injection wells were observed around the Subject Property.
Septic Systems:	A manhole cover leading to a septic system was observed in the northwestern corner of the proposed Capture Facility footprint.
Other Exterior Observations:	None.

4.6 Underground Storage Tanks/Structures

Observations	Description
Existing USTs:	Fuel dispenser islands were observed immediately north of the Temporary Parking, Office, and Staging Areas east of Elk Horn Road. The location of the UST that they draw from was not able to be discerned at the time that the site reconnaissance was performed.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), reports, or other evidence of the former presence of USTs was discovered during this Phase I ESA.
Other Underground Structures:	None observed.

4.7 Aboveground Storage Tanks

Observations	Description
Existing ASTs:	Numerous ASTs containing various materials, products, or wastes were observed on and around the Subject Property. Tank capacities ranged from approximately 250 gallons to 1,000,000 gallons. The greater capacity tanks typically held production water, non-potable water, heavy hydrocarbon condensate, oily water, or sludge. Smaller capacity tanks were observed to contain materials such as lubricants and engine oils. All tanks observed had secondary containment, predominantly comprising concrete dikes, though several tanks were contained by unlined earthen dikes.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during this Phase I ESA.

4.8 Adjoining Properties

4.8.1 Current Uses of Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining sites.

Direction	Observation
NORTH	EHPP Area: The site appears to be developed for oil and gas extraction. 11G Staging Area: The site appears to be developed for oil and gas extraction. 10G Staging Area: The site appears to be developed for oil and gas extraction.

EAST	EHPP Area: The site appears to be developed for oil and gas extraction. 11G Staging Area: The western portion of the 11G Staging Area is bordered to the east by administrative buildings. 10G Staging Area: The site appears to be developed for oil and gas extraction.
SOUTH	EHPP Area: The site appears to be developed for oil and gas extraction. 11G Staging Area: The norther portion of the 11G Staging Area is bordered to the south by administrative buildings. 10G Staging Area: The site appears to be developed for oil and gas extraction.
WEST	EHPP Area: The site appears to be developed for oil and gas extraction and supports a hazardous waste area and approximately six wastewater holding ponds. 11G Staging Area: The site appears to be developed for oil and gas extraction. 10G Staging Area: The site appears to be developed for oil and gas extraction.

4.8.2 Observed Evidence of Past Uses of Adjoining Properties

No indications of past use of the adjoining properties were observed

4.8.3 Pits, Ponds, or Lagoons on Adjoining Properties

As viewed from the Subject Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds, and lagoons on adjoining sites.

Direction	Observation
NORTH	None observed
EAST	None observed
SOUTH	None observed
WEST	The site is developed with approximately six wastewater holding ponds.

4.9 Observed Physical Setting

Observations	Description
Topography of the Subject Property and Surrounding Area:	The EHPP Area is composed of low rolling hills with an overall slope to the north. The neighboring properties to the west and east slope towards the Subject Property. The 10G and 11G staging areas are both relatively flat with an overall slope to the southeast. The neighboring properties consist of low rolling hills, which also have an overall slope to the southeast.

5 Interviews

Stantec conducted interviews with the following individuals:

Name, Contact Information, and Date of Interview	Relationship to Subject Property	Key findings:
Ryan Sexton ryan.sexton@crc.com February 21, 2025, and subsequent information provided.	Operations Specialist	During the interview with Ryan Sexton, Stantec noted that the Subject Property had operated as an oil and gas field for over a century. Current site operations include oil and gas extraction and processing to separate various products such as gasoline, butane, and propane from crude oil. To his knowledge, the Subject Property has experienced no notable releases of materials during the 17 years Ryan Sexton has worked at the facility.

Copies of interview documentation are provided in **Appendix G**.

6 Evaluation

This section provides a summary overview of findings, opinions, and conclusions.

6.1 Findings and Opinions

Information gathered from interviews, reviews of existing data, and an inspection was evaluated to determine if RECs are present in connection with the Subject Property. Based on this information, Stantec made the following findings and developed the following opinions.

Potential RECs

- The Subject Property has operated as an oil and gas extraction field since at least the 1910s to the present day. Equipment and facilities operated onsite include oil pumpjacks, bulk ASTs, IBCs, crude oil and production water ASTs, pipelines, and unlined sumps. Regulatory agency records did not reveal significant releases within the Project's permanent or temporary footprints, or in the immediately surrounding area; however, unreported or unidentified releases may have occurred. Previous site investigations of the Subject Property have identified VOCs and PFAS impacts in the soil. Given the long-term of the Subject Property and surrounding area operating as an oilfield, this land use with inherent risk of spills and releases impacting soil and soil vapor is collectively considered both a REC and a potential VEC.
- Several wastewater pits/mudlanes are located upgradient and west of the EHPP Area portion of the Subject Property, approximately 3,500 feet from the nearest proposed work area. No notices of violation were identified in connection with the wastewater pits, and two of the pits are listed as inactive. The wastewater pits and 27R Waste Management Complex are not considered likely to present a risk to the proposed CalCapture Facility given the distance to the proposed facility footprint.
- The EHPP stores, uses, and disposes of hazardous materials, including aqueous ammonia, sulfuric acid, lead batteries, and transformer oil. While no records of spills or releases of hazardous materials have been identified, and regulatory inspection records do not list outstanding violations, the potential exists for minor spills and unreported releases to have impacted the subsurface. The EHPP is in close proximity to multiple sections of the Subject Property including the proposed CalCapture Facility and proposed water lines, CO₂ pipeline, and electrical conduit are located directly adjacent to the EHPP. Given the proximity of the EHPP to the Subject Property, and the potential for unrecorded minor spills and releases to have occurred that may impact the Subject Property, the EHPP is considered a REC.
- Under the direction of a SWRCB order, a 2024 site investigation identified PFAS in soils within close proximity to proposed laydown yards, with the highest concentrations exceeding site-specific screening levels. These exceedances were observed with perfluorononanoic acid (PFNA), perfluorooctanoic acid (PFOA), and perfluorooctanesulfonic acid (PFOS). For PFNA, which has a screening level of 2,500 nanograms per gram (ng/g), a single soil sample had a concentration of 3,280 ng/g. There were 21 sample locations where PFOA exceeded the 16 ng/g screening level, with the highest reported concentration of 334 ng/g. PFOS detections exceeded the soil screening level of 51 ng/g at 14 locations with the highest reported concentration of 10,300 ng/g. The highest soil concentrations for PFNA, PFOA, and PFOS were observed at sample location B52-0.5, positioned over 700 feet south of the proposed 26R staging area. No

sample locations with concentrations of PFAS in soils exceeding regulatory screening levels were located within the proposed project or workspace footprints. The presence of PFAS-impacted soils that have attracted agency attention is not considered a REC for the Subject Property, given the distance from the CalCapture Facility footprint.

Potential CRECs

- The 10G Staging Area is collocated with an AOC identified by the CVRWQCB and DTSC and referred to as AOC-030-003. Soils in this area were identified as containing concentrations of arsenic exceeding the commercial/industrial cleanup goal of 26 mg/kg. Remedial action comprising excavation of all non-conforming soils between surface and 5 feet bgs was completed. Some non-conforming soils remain at depths greater than 5 feet bgs but are proposed to be mitigated through the implementation of institutional controls. In the absence of NFA designation issued for AOC-030-003, the presence of concentrations of arsenic at concentrations exceeding commercial/industrial cleanup goals but mitigated through institutional controls is considered a CREC. This CREC may be downgraded to an HREC upon issuance of a notice of NFA and case closure for this AOC.
- VOCs, including PCE and TCE, are present within soils located onsite as a product of historical releases by past operators. An associated LUC is currently placed on the Subject Property, which would limit the construction of any enclosed, occupiable structures and require a soil management plan to be approved by the DTSC and implemented during construction. The presence of VOC impacts to soil vapor and the associated LUC is considered a CREC, as future redevelopment of the Subject Property, including the proposed construction of the Project, would require DTSC approved soil management plans to be implemented prior to the initiation of the Project.

Items of Note and BERs

- Herbicides are used across the Subject Property and surrounding area for pre-emergent weed abatement and to reduce the risk of wildfire damage around key infrastructure. Pre-emergent herbicides historically contain RCRA hazardous chemicals which may have accumulated in concentration in near-surface soils on and around the Subject Property due to long-term application. The use of herbicides to suppress vegetation is considered a BER.
- Staining was noted on paved and unpaved surfaces at the Subject Property, and areas containing hazardous materials, petroleum products, and oily/leaking equipment were noted. Many of the impacts observed would be considered *de minimis*.
- Pole and pad mounted transformers were observed throughout the Subject Property. Although PCB use was phased out in 1977, it is not uncommon to find trace concentrations of PCBs in equipment that was not thoroughly cleaned when drained of PCB-containing fluids. At least one pole-mounted transformer was noted to be leaking, and there is the potential that other transformers elsewhere on-site may similarly be leaking. The potential for historical, current, and future releases of PCB-containing fluids and the ongoing potential for transformers with oils containing trace PCBs to spill to soil is considered a BER.
- CRC's existing health and safety program should be implemented to minimize dermal contact, inhalation, and ingestion exposure pathways if contaminative features are encountered during site redevelopment. Furthermore, a site-specific soil management plan should be implemented prior to initiating any construction on the Subject Property.
- Stantec recommends diligence in site maintenance to prevent the rendering of administrative violations and reduce the risk of future spills or releases.

6.2 Data Gaps

The federal AAI final rule [40 CFR 312.10(a)] and ASTM E1527-21 identify a data gap as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the EP or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions from Scope of Work Referenced in Section 1:	None.
Weather-Related Restrictions to Site Reconnaissance:	None.
Facility Access Restrictions to Site Reconnaissance:	Access to facilities neighboring the Subject Property were restricted due to the safety considerations associated with the oil and gas processing and power generation operations actively being conducted. This data gap is not anticipated to impact the findings or conclusions of this Phase I ESA.
Other Site Reconnaissance Restrictions:	None.
Data Gaps from Environmental Records Review:	None.
Data Gaps from Historical Records Review:	None.
Data Gaps from Interviews:	None.
Other Data Gaps:	None.

6.3 Conclusions

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located 4026 Skyline Road, Tupman, California, and associated with APNs 158-090-02, 158-090-04, 158-090-16, 158-090-18, and 158-090-19, the Subject Property. Any exceptions to, or deletions from, this practice are described in Section 1.3, 1.3 Special Terms, Conditions, and Additional Assumptions. This assessment has revealed the following evidence of RECs in connection with the Subject Property:

RECs

- The long-term use of the Subject Property as an oilfield and ancillary processing facilities, with inherent risk of spills and releases impacting soil and soil vapor, is collectively considered both a REC and a potential VEC.

- Several wastewater pits are located upgradient and west of the Subject Property, approximately 0.7 miles west of the CalCapture Facility. No notices of violation were identified in connection with the wastewater pits and two of the pits are listed as inactive. While considered a REC, the wastewater pits and 27R Waste Management Complex are not considered likely to present a risk to the proposed CalCapture Facility given the distance to the proposed facility footprint, or the Project given that pipelines proposed to extend closer to this feature will be constructed above ground.
- The EHPP stores, uses, and disposes of hazardous materials, including aqueous ammonia, sulfuric acid, lead batteries, and transformer oil. Given the close proximity of the EHPP to the Subject Property, and the potential for unrecorded minor spills and releases to have occurred that may impact the Subject Property, the EHPP is considered a REC and potential VEC.
- A 2024 site investigation identified PFAS in onsite soils, with the highest concentrations exceeding site-specific screening levels. Minimal remedial action would be required to mitigate existing health risks for workers posed by PFAS-containing soils. The presence of PFAS-impacted soils that have attracted agency attention is not considered a REC for the Subject Property, given the distance from the CalCapture Facility footprint.

CRECs

- The 10G Staging Area has undergone remedial action to remove arsenic-impacted soils from the surface to a depth of 5 feet bgs, though some non-conforming soils remain at depths greater than 5 feet bgs. These residual impacts are proposed to be mitigated through the implementation of institutional controls. In the absence of NFA issued for AOC-030-003, the presence of concentrations of arsenic at concentrations exceeding commercial/industrial cleanup goals but mitigated through institutional controls is considered a CREC. This CREC may be downgraded to a HREC upon issuance of a notice of NFA and case closure for this AOC.

7 Non-Scope Considerations

The scope of work completed was limited solely to those items in the ASTM E1527-21 standard. No ASTM E1527-21 defined “Non-Scope Considerations” were performed as part of this Phase I ESA.

Appendix B Stantec Resumes

Eli Hill

Staff Environmental Scientist
3 years of experience · Thousand Oaks, California

Eli is an environmental professional with two years of experience in the environmental services and construction industries. His qualifications include experience with compliance monitoring, field investigation services including the conducting of Phase I Environmental Site Assessments, determining site-specific Best Management Practices (BMPs), technical report writing, QA/QC policy implementation, stormwater regulatory compliance, acquisition of permits, and data analysis/interpretation. Although he specializes in industrial stormwater compliance and environmental site assessments, Eli also has fulfilled responsibilities associated with the scoping, planning, coordinating, and overseeing of subcontractors for a variety of projects and stakeholders. Eli has worked on projects under the direct oversight of various regulatory agencies including the DTSC, SWRCB, and SC AQMD.

PROJECT EXPERIENCE STORMWATER PERMITTING

Genesee & Wyoming, Inc. Stormwater Compliance Plans* | Genesee & Wyoming Inc. | 2021-2023 | Staff Environmental Scientist

Eli served as a document preparer and facility inspector for Genesee & Wyoming rail facilities. This project is centered around assisting Genesee and Wyoming facilities located across the continental United States that require assistance in achieving stormwater compliance based upon federal, state, and local regulations. He regularly engaged in the drafting of Stormwater Pollution Prevention (SWPPP) and Spill Prevention, Control, and Countermeasures (SPCC) plans, conducting facility inspections, and researching location-specific regulations pertaining to industrial stormwater activities. Additional responsibilities included the investigation, documentation, and reporting of any quantifiable spills at Genesee and Wyoming facilities operating under stormwater compliance plans provided by Eli.

SOIL AND GROUNDWATER REMEDIATION SYSTEMS

Los Angeles County Metro, Hi-Tech Dry Cleaners* | Los Angeles County Metropolitan Authority | Los Angeles, California, United States | 2021-2023 | Operations and Maintenance Technician

Mr. Hill fulfilled the role of operations and maintenance technician for the soil vapor extraction system located at the Hi-Tech Dry Cleaners Site in Crenshaw, California. Part of his operations and maintenance duties included regularly conducting the sampling of soil vapors, performing maintenance on the soil vapor extraction system, and engaging in the compiling of critical information into purposeful reports for submittal to regulatory agencies according to permitting requirements. Data that he collected through sampling and compiled for inclusion in the semi-annual reports consisted of VOC concentrations detected, mass removed, and the data obtained from weekly monitoring performed at the site.

DRILLING, SAMPLING AND INSTRUMENTATION SERVICES

Phillip 66 Lube Station, Soil Sampling by Means of Air Knifing | Phillip 66 | Los Angeles, California, United States | Staff Environmental Scientist

Eli served as both a sampling technician and an Air-Vac crew supervisor in support of soil sampling efforts that were completed at a Phillip 66 Lube Station in Los Angeles, CA during the month of April 2022. Efforts associated with duties performed included collecting, analyzing, and documenting soil samples collected from varying locations and depths throughout the facility. Responsibilities designated to Eli also included monitoring and ensuring the Air-Vac rig equipped with an air knifing tool and its crew performed duties in a safe and efficient manner while operating on the property of an active oil refinery. As a result of the capabilities of Eli and the other personnel dedicated to these efforts, 23 days of rig work were completed over a 10-day work period and most importantly, no injuries or accidents occurred during the duration of these activities.

** denotes projects completed with other firms*

VEGETATION ENVIRONMENTAL ASSESSMENTS

Pacific Gas and Electric, Enhanced Vegetation Management* | Pacific Gas and Electric | 2022 | Enhanced Vegetation Management Specialist

Eli served the role of Enhanced Vegetation Management Specialist for Pacific Gas and Electric's Enhanced Vegetation Management Project. In this role, Eli performed a variety of functions including surveying vegetation that posed a hazard to the integrity of utility lines as well as collecting data on habitats that posed potential ecological constraints due to their proximity to vegetation management work. Due to the isolated and ever-changing nature of the role he fulfilled, Eli learned how to plan and execute field work in a safe and independent manner, while simultaneously ensuring fellow vegetation management specialists received the support that they required.

ENVIRONMENTAL ASSESSMENTS

LACPW Site Investigations | Los Angeles County Public Works | Los Angeles, California, United States | Field Staff, Report Author

Eli's contributions to the LACPW Site Investigations Portfolio included performing research into historical records, requesting information from various local and state agencies, performing site reconnaissance at seven different sites, and authoring multiple Phase I ESA reports detailing the findings of the investigations. The historical sources reviewed and interpreted by Eli included aerial photography, topographic maps, Sanborn maps, and city directories. Eli gathered information and records from state and local agencies through direct contact or by the searching of online databases including but not limited to GeoTracker, FUDS, EnviroStor, WellFinder, and the NPMS Public Map Viewer. Eli was responsible for interpreting records and data received in order to identify any potential environmental concerns that could be associated with the property in question and subsequently detailing the findings within a Phase I ESA report that conforms to the ASTM E1527-21 Standard Practice for Environmental Site Assessments. The LACPW Site Investigations Portfolio also included a Phase 2 ESA, which Eli participated in by coordinating subcontractors and materials required to complete the work, as well as assisting during drilling, sample collection, and reporting activities.

** denotes projects completed with other firms*

Tom Stanley P.G.

Associate Geologist

8 years of experience · Ventura CA, California

Tom is a licensed Professional Geologist with over 8 years providing environmental consulting to a variety of municipal, commercial, and NGO clients. His fields of specialization include Phase I & II environmental site assessments (to ASTM and AAI standards); soil, soil vapor, and groundwater investigation; and remediation oversight. Tom has worked as part of the site assessment and remediation team at Stantec to provide technical excellence and exceptional customer service on projects including renewable energy sites, water and product pipelines, former industrial sites, and current/historical military sites.

EDUCATION

BSc/MGeol Geological Sciences, University of Leeds, Leeds, United Kingdom

CERTIFICATIONS & TRAINING

40-Hour OSHA Health & Safety Certification, HAZWOPER, , , United States, 2020

8-Hour OSHA Supervisor's Certification, , , United States, 2020

Lead Sampling Technician, State of California Department of Public Health, Sacramento, California, 2023

REGISTRATIONS

Professional Geologist #10211, State of California, 2023

PROJECT EXPERIENCE

ENVIRONMENTAL SITE ASSESSMENTS

Mare Island Naval Shipyard Phase I ESA Portfolio | City of Vallejo | Vallejo, California, United States | 2022-2023 | Portfolio Lead Author

Tom assumed the role of lead author for a portfolio of three Phase I Environmental Site Assessments (ESAs) located across portions of the former Mare Island Naval Shipyard in Vallejo, California. He completed in-depth research, review and interpretation of numerous historical site assessment and characterization reports to holistically assess the potential risks associated with acquisition and redevelopment of each of the parcels. Principal sources of risk included the potential presence of UXO and spent munitions, releases of hazardous materials, potential vapor encroachment conditions, and land use covenants. Together with the wider Stantec team, Tom succeeded in providing the City of Vallejo a succinct overview of the historical uses and potential

future risks associated with each of the properties, in order to inform potential costs and impediments to be overcome as the City pursued acquisition and safe redevelopment.

Former NASA Industrial Plant | Confidential Healthcare Provider | Downey, California, United States | 2020 | Field Lead

Stantec assisted in the potential acquisition of a property located on a former NASA rocket and materials testing facility. Tom supported the preparation of a Phase I ESA to identify potential sources of contamination located on the property and to assess the potential for known off-site contamination to impact the subsurface media at the property. He assisted in scoping, scheduling for, and directing a limited Phase II Environmental Site Assessment. Soil vapor probes were installed across the Property to assess the presence and extent of solvent plumes in soil vapor. Soil and groundwater samples were taken to assess the potential source of the observed vapor phase plumes beneath the property. Further analysis of the data led to the identification of two discrete plumes at the property: one derived from an off-site source; the second was identified to be associated with a localized source within the property boundary. Based on the findings of the Phase II ESA, recommendations of the likely mitigation measures were made based on the identified soil vapor contamination. In addition, the investigation identified that should the acquisition proceed, the Client could be required to accept partial responsibility for potential future litigation or remediation of the regional soil vapor phase contamination plume.

Valley Generating Station Stormwater Capture Project | Los Angeles Department of Water and Power | Los Angeles, California, United States | 2022-2023 | Field Lead

Tom assumed the field lead role for a site investigation program comprising the advancement of over 90 soil borings across an LADWP power generation facility. The completed assessment was designed to evaluate soils for potential impacts that may present due to long-term use of the site as a power generation facility, with constituents of concern including polychlorinated biphenyls (PCBs), heavy metals, and petroleum hydrocarbons. The results of this investigation were to be used to assess potential risk to construction workers and to identify whether there may be additional costs for disposal of soils during the construction of several drainage basins. The work was completed under oversight by the United States Environmental Protection Agency, with strict adherence to sampling quality control and assurance protocols in line with Toxic Substances Control Act (TSCA) regulations. Tom assisted in scheduling and managing subcontractors

and other Stantec personnel, promoted positive relations and maintained effective communication with on-site facility staff, ensured strict adherence to the proposed work plan, and assisted in post-field reporting activities.

State Water Project, Ventura Interconnector | Ventura County | Ventura, California, United States | 2020 - 2022 | Author, Field Lead

Stantec's environmental assessment team was tasked with identifying potential areas of concern along the proposed route of a State Water Project interconnector pipeline. Two specific areas of concern (a historical oil well and a historical burn dump landfill site) were identified as potentially impacting the pipeline project. Tom completed a review of historical documents and reports, and then scoped, contracted, and supervised geophysical surveys at each of the areas of concern in order to evaluate the potential presence of the historical oil well and delineate the extents of the landfill site. The likely location of the oil well was identified using an electromagnetic survey, allowing appropriate mitigation measures to be included within the design of the pipeline. The extent of landfill material was mapped using a resistivity survey, which was followed up with the completion of a drilling and sampling exercise to further assess the nature and extent of the landfill material. Tom collected soil samples for laboratory analysis to further evaluate potential risks to workers who may come into contact with the fill material during construction of the pipeline. The completed investigation allowed the project to proceed with the potential risks associated with historical areas of concern having been assessed and quantified.

MacPherson Position Phase I ESA | Confidential Petroleum Company | Bakersfield, CA | 2023 | Project Manager, Lead Author

Tom scoped and managed a Phase I ESA covering over 7,000 acres of oilfield land to be acquired by the Client. Due to escrow time constraints and confidentiality requirements, the project was scoped and completed by a small, focused team within three working weeks, including a two-day site reconnaissance and comprehensive agency file reviews. Numerous recognized environmental conditions (RECs) were noted, assessed in the context of proposed ongoing use, and reported in a succinct manner designed to allow the Client to quickly and easily understand sources of risk associated with the acquisition.

GridStor BESS Phase I Environmental Site Assessments | GridStor | Rancho Cucamonga, California, United States | 2023 | Project Geologist

Assumed the role of assistant lead author and technical reviewer for two Phase I ESAs of properties identified as potential strategic acquisitions for redevelopment as battery energy storage sites. Assisted in evaluating on-site and off-site potential sources of impacts and provided technical recommendations in the context of the proposed redevelopment as a BESS site.

Lava Solar Project Phase I Environmental Site Assessment | Hecate Energy LLC | Cedar City, Utah, United States | 2023 | Lead Author

Tom assumed the role of lead author for Phase I ESA of

a collection of parcels near Cedar City, Utah, identified by the client as a potential acquisition for the development of a solar energy project. He coordinated information requests to local and state authorities and reviewed historical data to assess the current and historical uses of the property. A site reconnaissance visit was completed to identify current site conditions and further evaluate possible items of note identified during the historical data review. A complete Phase I ESA report, prepared to the specifications of the American Society of Testing and Materials (ASTM) E1527 21 and E2247-16, was provided to the client. The report documented Stantec's findings and identified potential sources of risk or cost should the project proceed.

Stormwater Infiltration Project | Los Angeles County Public Works | Los Angeles County, CA, USA | 2024 | Task Manager

Tom acted as Task Manager and Quality Control reviewer to lead a small team of environmental professionals to prepare a portfolio of eleven Phase I Environmental Site Assessments (ESAs) of potential stormwater infiltration gallery locations proposed within public roadways located throughout Los Angeles County. The Phase I ESAs focused on potential sources of impacts that could present a risk to construction workers, or risk of mobilizing soluble contaminants through long-term stormwater infiltration. All reports were completed in compliance with ASTM E1527-21 and included a review of an environmental database radius report, regulatory information, historical aerial photographs, fire insurance maps, and topographic maps. File review requests were made to local agencies in accordance with the Freedom of Information Act. Findings of the ESAs were summarized and categorized as recognized environmental conditions (RECs), controlled RECs (CRECs), historical RECs (HRECS), and de minimis conditions, business environmental risks, or items of note, as appropriate.

BROWNFIELD REMEDIATION AND REDEVELOPMENT

Cesar Chavez Community Garden Remediation Project | City of Los Angeles, Department of Public Works, Brownfields Division | Los Angeles, California, United States | 2020-2022 | Geologic Staff

Tom assisted in the scoping and completion of a soil and soil vapor investigation at a community garden site to confirm and further delineate heavy metal and solvent impacts identified by previous consultants. He co-authored a remedial action plan which was approved by the California Department of Toxic Substances Control. Tom provided supervision of remedial excavation work and collected confirmation soil samples prior to directing backfill and compaction with clean imported fill. The project received case closure, allowing a parcel of significant community value to return to safe use by the community.

Cald Battery Energy Storage Site | AYPa Power LLC | Los Angeles, California, United States | 2020-2023 | Project Geologist

Stantec assisted a renewable energy client in assessing and remediating a former scrap yard facility into a battery energy storage system (BESS) facility. Tom completed

reviews of prior Phase I ESA and Phase II ESA reports to identify data gaps associated with the assessment of the site, and then scoped and led an additional soil and soil vapor sampling program designed to close those gaps. Following the additional site characterization work, Stantec worked with the client to enter a Voluntary Cleanup Agreement under the California Department of Toxic Substances Control. Tom assumed a lead role in permitting the removal of a clarifier structure and three previously undocumented underground storage tanks, including registering with the California Environmental Reporting System (CERS) and California Department of Tax and Fee Administration (CDTFA).

Slauson & Wall Redevelopment Project | County of Los Angeles Department of Public Works, Sanitation & Environment Brownfields Division | Los Angeles, California, United States | 2023-Present | Project Geologist

Stantec assisted the City of Los Angeles Brownfields Program with the ongoing site assessment and remedial evaluations for a 7-acre brownfield parcel. Tom operated as the Lead Author on a Response Plan aimed at transforming a former metal plating facility into a mixed-use residential, commercial, and recreational park. The document summarized the site's contamination history and environmental assessment activities and included a Conceptual Site Model. This model was revised to show how proposed mitigation measures would remove source-to-receptor pathways, ensuring the site was safe for its intended use. Once the Response Plan was approved by the DTSC, Tom assisted in the staged completion of the proposed remedial actions. This included coordinating Stantec personnel and subcontractors to complete a comprehensive drilling program across the site alongside demolition activities, helping to further evaluate the vertical and lateral extent of chlorinated solvent impacts in soil and soil vapor. Tom then assumed the role of field manager during site-wide remedial excavation activities. He coordinated a field team to methodically screen, sample, excavate, and dispose of site soils containing constituents of potential concern at concentrations exceeding site cleanup goals.

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Lewis is a State of California Licensed Professional Geologist with more than 28 years of professional experience in the environmental consulting field. He is currently supporting multiple brownfield and renewable energy redevelopment projects (BESS, wind and solar) across the US. Lewis is currently Stantec's program leader supporting the existing LASAN Brownfield Program. In addition, Lewis provides litigation/expert witness support services for a variety of attorney clients. Fields of specialization include Brownfield Redevelopment Services, Hazardous Waste Management, Due Diligence and Compliance Audits, Phase I & II Environmental Site Assessments, Remediation and decommissioning, Expert Witness Litigation Support, Former Oilfield Redevelopment/Construction Projects, Methane Site Assessment & Mitigation, Solid Waste Landfill Projects, Risk Assessments, Air Sampling, Stormwater Pollution Prevention, completion of projects under direct oversight from the EPA/DTSC, and the implementation of Environmental Management Systems under ISO 14001 Guidelines. Lewis and his Stantec team are currently managing a diverse range of site assessment and remediation projects and has successfully closed sites with lead regulatory agency oversight provided by the Regional Board, DTSC and multiple other Local Oversight Programs throughout California, such as the Los Angeles County Fire Department (LACFD), Orange County Health Care Agency (OCHCA), Riverside County Environmental Health, and the County of Ventura Resource Management Agency (VCRMA).

EDUCATION

MS, EIA, Auditing, and Environmental Management Systems, University of East Anglia, Norwich, England, 2001

BS, Geology, University of Leicester, Leicester, England, 1995

REGISTRATIONS

Professional Geologist #7976, State of California

Ventura County Watershed Protection District, Water Resources Division, Registered Well Inspector

Member of the Geological Society of America (GSA), # 9113742

KEY PROJECT EXPERIENCE

**LASAN Brownfield Redevelopment Program,
Stantec Technical Program Leader – 2019 - Present**

**Technical Advisor, SIR Services, LADWP, 2019-
Present**

Lewis is currently the program leader and technical advisor for the execution of due diligence, site assessment and remediation services under the current on-call contract with LASAN, as well as the City of Los Angeles Department of Water and Power (LADWP), Site Investigation and Remediation Services (SIR) on-call contract where Lewis provides technical scoping support to the execution of various projects involved with acquisitions, divestments, leases, and large area corridor assessments and investigations. Lewis's international, US and California focused background brings extensive technical experience to support LASAN and drive the successful delivery of transformational projects within a complex regulatory and environmental setting. Lewis is well versed in due diligence, site assessment and the remediation of sites involving petroleum hydrocarbons, VOCs, SVOCs/PAH's, heavy metals, and other contaminants of concern that include but not limited to PCB's, herbicides/pesticides, NORM/TENORM. Lewis has also led and supported multiple vapor intrusion redevelopment projects that have included retrofit and new construction integration of VIM systems. Lewis's diverse experience in waste management provides additional support to the Stantec team in driving waste minimization (sampling) strategies and the accurate characterization and profiling of waste streams generated as a result of site investigation and remediation processes.

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Brownfield Assessment & Remediation (Redevelopment) Projects

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Phase I ESA, Los Angeles River, 8 Parcels. Los Angeles, CA

Lewis managed the completion of a Phase I ESA of 8 parcels located adjacent to the Los Angeles River. The study was completed to evaluate potential risk and liability associated with the future use and transformation of the parcels. The study forms part of the objective to transform parcels along the LA River for beneficial use, that also coincides with the upcoming LA Olympics in 2028.

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Former Lincoln Heights Jail, Los Angeles, CA

Lewis is currently providing technical site assessment consulting support services in support of a cleanup grant application administered by the LARWQCB. Services include the evaluation of existing soil vapor and groundwater conditions and the submittal of the data to request funding and the remediation of impacts in advance of the proposed redevelopment of the former jail property into a mixed use residential and commercial development. Stantec has also provided technical assistance associated with the feasibility of removing underground storage tanks that are located in close proximity to the existing building foundations.

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Slauson Wall Brownfield Redevelopment, Development, and Implementation of DTSC Response Plan

Lewis is currently leading and providing support on the development and implementation of a response plan under the lead regulatory oversight of the DTSC. The former chrome plating and industrial manufacturing site will be redeveloped into mixed use residential housing and recreational park space. Work to date includes characterizing soil and soil vapor existing conditions at the Site, supporting the City General Services Division in the removal of existing concrete and infrastructure, a drone aerial survey and utility geophysical survey to map and spatially reference all existing features and known historical source areas based on research and review of available documents and historical aerial photos. The response plan is being implemented under an ECRG grant in the amount of \$6.8M.

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Marlton Square Shopping Center, Los Angeles, California

Lewis provided technical consulting support to evaluate the scope and extent of impacts identified at a former shopping mall property located in Los Angeles. The services included presenting the likely scope, estimate of probable costs and remedy for the mitigation of impacts to allow safe redevelopment of the property. Lewis presented the information on a conference call attended by the CalEPA DTSC, City of Los Angeles, and the developer. The call enabled key stakeholders to evaluate the scope of remedial action, the short and long-term risks, as well as the consideration of mitigation measures (vapor barriers) recommended for the proposed use ensuring future redevelopment could occur unimpeded.

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Former Bethune Library, S. Vermont Avenue, Los Angeles, California

Lewis is supporting the City of Los Angeles with a Brownfield Commercial Redevelopment Site that was formerly used for automotive gas station and repair purposes. Services provided to LASAN include a site investigation to characterize the Site and develop a remedial action workplan under regulatory oversight of the Los Angeles County Fire Department and the LARWQCB. Based on the completion of the site characterization work, the open case was able to be closed on the basis that shallow soil impacts from primarily lead, arsenic and total petroleum hydrocarbons do not pose a risk to groundwater and will be removed under the implementation of a RAW with LACFD oversight. The Final RAW has been issued to the LACFD and the next step will be to implement the RAW and then move the Site towards redevelopment into a commercial property.

Former Marine Service Building, Phase I & Phase II ESA, 740 E. & 800 E. 111th Place, Los Angeles, California

Lewis is currently serving as the key technical lead for environmental assessment and site remediation services for LASAN's Brownfield Redevelopment Program. Lewis is currently managing the completion of Phase I and Phase II ESAs on two commercial properties that have been identified by the LASAN being selected for redevelopment under their Brownfield Redevelopment Program. Scope of services included the completion of a Phase I ESA, Phase II ESA and additional investigation to identify the likely source of chlorinated solvent impacts that were identified during the initial Phase II ESA. Additional services included projection of costs and the scope of corrective action work that would likely be required to address environmental impacts to allow redevelopment of the property for the intended future use as an electric bus depot. In July and August of 2021, Stantec completed additional assessment of soil, soil vapor and groundwater to identify the source of the chlorinated solvents that were identified in shallow soil vapor of the 800 Property. The work is critically important to ensure the potential acquisition and redevelopment of the Property for continued warehousing use does not present risk and liability for the City of Los Angeles.

* denotes projects completed with other firms

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

City of Los Angeles, Department of Public Works, Bureau of Sanitation (LASAN), Former Bethune Library, Los Angeles Regional Water Quality Control Board, Site Characterization & Case Closure

As the lead technical site assessment and remediation program manager, Lewis provided technical oversight for a LARWQCB-led Phase II ESA at the Former Bethune Library Property in Los Angeles. The purpose of the investigation was to evaluate the presence of petroleum hydrocarbons and heavy metals (principally lead) as a result of a former UST that was located on the property prior to the Bethune Library. The scope of work included a technical workplan submitted to the LARWQCB for review and approval and implementation of the plan on behalf of LASAN. A technical report documenting the soil borings, soil and soil vapor sampling results was prepared and uploaded to the SWRCB's Geotracker online database. Stantec recommended and requested the case be closed based on the favorable results of the soil and soil vapor testing, which will enable LASAN to move forward with its plans to redevelop the property. The LARWQCB concurred with this recommendation and the Site was closed in a letter issued by the LARWQCB on February 26, 2020.

City of Los Angeles Department of Recreation & Parks (LADRAP), Multi-tenant Single Occupancy Residential Property, Allegheny Street, Sun Valley, California, Phase I ESA.

As the technical lead for site assessment and remediation services provided to LADRAP, Lewis oversaw the completion of a Phase I ESA that is planned for redevelopment from a property currently containing three single family homes, into a local community park. Lewis ensured the report was delivered under an expedited timeframe and in accordance with ASTM 1527-13. Regular updates on findings were integral to ensure LADRAP could make critical informed decisions on the condition of the property, and any further action that may be warranted to allow the property to be redeveloped into a community park. The project supports the promotion of access to recreational space and shade that communities are often underserved.

City of Los Angeles, Dept. of Public Works, Bureau of Sanitation (LASAN), Pico Union Community Garden Redevelopment Project, Los Angeles, California

Lewis was the technical lead and project manager for the assessment and remediation of a community garden located in Los Angeles, CA that was formerly used for dry cleaning and historic automotive service repair services. Impacts from heavy metals (arsenic and lead) were identified in shallow soils that will need to be mitigated with oversight provided by the CalEPA DTSC. Services provided include the presentation of prior existing environmental soil sampling data, entry into a voluntary cleanup agreement administered by the DTSC, development and implementation of a technical workplan to mitigate shallow soil impacts to ensure the property is suitable for redevelopment into a local community park. Community outreach will be an integral part of the project to ensure all stakeholders and the local community are kept informed on the progress of this transformational and beneficial redevelopment project to the residents of the City of Los Angeles. Remedial action was completed, and a certificate of completion issued by the DTSC on June 29, 2022.

Confidential Healthcare Client, Hospital Expansion Construction Project, UST Removal, Downey, California

Lewis managed the expedited removal of a UST that was inadvertently encountered during the installation of utility lines associated with the expansion of an existing medical center. The location of the UST encountered adjacent to the new parking structure that was being built was previously unknown. Lewis was able to expedite the removal of the UST using Stantec's trusted subcontractor network that included mobilization of a UST removal subcontractor and use of a lab that could provide the testing of confirmation soil samples (post UST removal) on a 24- to 48-hour rush turnaround timeframe. Timing was critical to remove the UST and minimize downtime by the client's general contractor. A technical report documenting the removal was prepared for the City of Downey Fire Department as well as the Los Angeles County Department of Public Works. Based on the highly favorable results, a request to close out the reported UST was requested along with confirmation of no further action required.

Oil & Gas

BP/ARCO Tesoro, Litigation Support & Natural Gas Pipeline Decommissioning Services, Hollywood Park Racecourse & Casino, Inglewood, California

* denotes projects completed with other firms

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Stantec developed a positional report pending legal action by the owner of the Hollywood Park Racecourse & Casino Property for alleged impacts resulting from the operation of a natural gas pipeline. The key contaminants of concern were principally arsenic and TPH. Based on research conducted by Stantec, the positional report was able to determine that the majority of the 238-acre site had significant impacts from arsenic and TPH that could not be attributed to the natural gas pipeline. In addition, investigative research, and the decommissioning of four remaining sections of pipeline confirmed that elevated concentrations of arsenic and TPH detected in soil directly beneath the pipeline were a result of the property owner driving fence posts and a light stand into the natural gas pipeline (right of way), which caused the hotspot detections of arsenic detected in soil. Based on the submittal of the positional report to the Property owner, the client was not contacted any further or approached with respect to the Property owners claims that their operation of the natural gas pipeline had caused impacts to soils at the Property. Instead, it was proven that the Property as-a-whole was impacted with elevated arsenic and TPH.

Stantec provided oversight for the removal of four sections of the inactive Former British Petroleum, Atlantic Richfield Company (BP ARCO) natural gas pipeline 216A. The four sections of pipeline were located along the west and south peripheral boundary areas of the Hollywood Park Racecourse and Casino Property parking lot directly adjacent to South Prairie Avenue and West Century Boulevard in Inglewood, California 90301. The decommissioning activities for the four remaining sections of the natural gas pipeline occurred from May 27, 2015, to June 10, 2015. The ownership of the former pipeline was transferred from BP ARCO to Tesoro in approximately 2012/2013.

Confidential Healthcare Client, Mental Health Facility Expansion, Former Oil Exploration Redevelopment Project, Los Angeles City Oil Field, Los Angeles, California (Ongoing)

Lewis directed the research, investigation, and mitigation of former oil wells at a proposed medical expansion redevelopment project located in the City of Los Angeles Oil Field. Lewis is working with the State of California Department of Conservation, Division Oil, Gas & Geothermal Resources (DOGGR) and the local permitting agency, Los Angeles Department of Building & Safety (LADBS). Scope of work included geophysical surveys to identify potential locations of up to 53 reported oil wells and other anomalies, physical exposure of the oil wells using a backhoe excavator, leak checks and the abandonment of oil wells to current DOGGR standards. In addition, soil vapor surveys were conducted in accordance with LADBS guidelines to evaluate the presence of methane and identify the design basis for methane mitigation measures for both the retrofit of the existing and proposed new buildings and parking structure planned for the redevelopment and expansion of the medical services currently provided.

Former ARCO Pipeline No. 1 Decommissioning Project, Needham Ranch, Newhall, California (Principal Geologist)

Lewis directed and coordinated oversight for the removal of former ARCO Pipeline No. 1 (owned by Tesoro/now Marathon), located on a proposed large tract residential redevelopment property located at Needham Ranch, Newhall, CA. Lewis mobilized a crew to provide oversight, document the removal of the pipeline by the developer's general contractor and collect confirmation soil samples. The oversight was provided to ensure any potentially contaminated soils, if identified as sourced from the former ARCO pipeline No. 1 were segregated, profiled, and handled appropriately. The project was complicated by three other pipelines located in the area, one of which was located directly adjacent to the former ARCO Pipeline No. 1. Stantec's oversight during the decommissioning activities was able to determine that the integrity of the former ARCO Pipeline No. 1 was intact. In addition, the oversight documented the small release of oil from the adjacent oil pipeline while it was being removed. Stantec provided photographic documentation records that the oil released was not from the ARCO Pipeline No. 1 but attributed to the pipeline operated by SoCal Gas Company.

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Shell Petroleum, Due Diligence and Compliance Audits, Riverside, Central and Southern California (Southern California Project Team Leader)

Lewis was the Southern California project team leader for conducting due diligence and compliance audits for Shell petroleum retail facilities located throughout Riverside County. The work included the development of a compliance checklist and resolving all notice of violations (NOVs) issued by the Riverside County Environmental Health Care Agency. Each Shell-owned facility was audited for evidence that NOVs were resolved; current SB 989 testing and compliance; and permits and hazardous materials business plans were current, accurate, and a copy was filed at the lead agency. Waste disposal and training records, as well as designated operator inspection reports, were reviewed; emergency equipment and procedures were checked to make sure they were available and on site. Strict deadlines set forth by the district attorney were met to ensure Shell's facilities met compliance with all Federal, state, and local regulatory requirements. The compliance work was extended to include all counties within Southern California. The cost was approximately \$1,500,000.

Confidential Retail Client: Site Assessment and Remediation of former Automotive and Dry Cleaners, Anaheim, California (Project Manager)

Lewis managed a complex site assessment and remediation of a former retail Store located in Anaheim, California. Sources of impacts identified in soil, soil vapor, and groundwater that were associated with a former dry cleaners and automotive service station that formerly operated at the property. Work included the evaluation of all historical soil, soil vapor, and groundwater data associated with the site to date; the completion of an updated site assessment to evaluate current environmental conditions; and remediation of these source areas. Lewis worked closely with the City of Anaheim Public Utilities Department and the Santa Ana Regional Water Quality Control Board to obtain no further action status for the Site. Liaison and regular meetings due to the aggressive schedule required for cleanup to residential levels and redevelopment of the property into residential condominiums was an integral part of the project's success. Case closure and no further action status were granted by the regulatory agencies in February 2012. The contract for this work was approximately \$3.5M.

Former Ultramar Station # 77, Yorba Linda, CA 92886 Site Assessment and Remediation, Yorba Linda, CA (Principal in Charge, Project Manager)

Lewis managed the assessment and remediation of a former Ultramar gas station and automotive service station located in Yorba Linda, CA. Lewis supported the city to cleanup and close out the open case site under regulatory oversight from the Orange County Health Care Agency (OCHCA) and the Santa Ana Regional Water Quality Control Board (SARWQCB). The former petroleum retail and automotive service station was condemned, and the city took the Site on to address the unauthorized release of petroleum hydrocarbons to soil and groundwater beneath the site. The site was fully characterized (soil, soil vapor and groundwater) and remedial corrective action included the direct excavation of source impacts, soil, and soil vapor extraction with ozone sparge and direct oxygen sparge to localized and isolated impacted groundwater. The site was closed under Scenario 4 (with a bio-attenuation zone) under the Low Threat Closure Policy (LTCP) administered by the State Water Resources Control Board (SWRCB) and a no further action and case closure letter was issued by the OCHCA (and SARWQCB) on July 22, 2020. The Site is now being redeveloped into a restaurant.

Expert Witness/Litigation Support

Technical Consulting/Litigation Support Services, Aerospace Manufacturing, Chlorinated Solvents Torrance, California

Lewis and his team are actively providing litigation support services associated with a chlorinated solvent release site located in Torrance, CA. The work to date has included research and review of all available documents, correspondence and reports associated with the case led by the LARWQCB, the completion of vapor intrusion assessment reports and evaluation of existing aerospace manufacturing buildings, the development of conceptual site models (CSMs) and continued technical support on behalf of the attorney client. Stantec is currently developing a technical workplan to complete a site characterization level investigation of soil, soil vapor and groundwater at the site, which will include the collection and analysis of data to evaluate on site and off-site sources of chlorinated solvent VOCs.

Expert Witness/Legal Support Services, Current Retail Store/Formal Industrial Dry-Cleaning Facility (Chlorinated Solvents), Richmond, California

* denotes projects completed with other firms

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Lewis is providing expert witness services on behalf of two aerospace manufacturing facilities located in Torrance, CA. The support is being provided as part of several entities that are suspected to have had unauthorized releases of chlorinated solvents to soil and groundwater beneath the Sites. The case is led by the Los Angeles Regional Water Quality Control Board (LARWQCB). In response to cleanup and abatement orders to evaluate and address suspected releases to the potentially responsible parties, Lewis and the Stantec team recently completed a Soil Vapor Intrusion Assessment of the two Sites to evaluate if occupants of the facilities are potentially at risk from chlorinated solvents documented to be present within soil, soil vapor and groundwater beneath the Site.

Expert Witness/Legal Support Services, Current Retail Store/Former Industrial Dry-Cleaning Facility (Chlorinated Solvents), Richmond, California

Lewis worked closely with an international retail corporation's legal counsel to evaluate claims by the DTSC that a former industrial scale dry cleaning facility had historically operated within the footprint of the retail store and had resulted in a release of chlorinated solvents to groundwater and had contributed to regional chlorinated solvent groundwater impacts that are well documented within the Richmond, California area. Lewis conducted research and implemented a site investigation designed to evaluate the claim. The investigation work was witnessed by the DTSC's consultant and Lewis was successfully able to demonstrate to the CalEPA DTSC that the former dry cleaners and broader property owned by the client had not contributed to regional groundwater impacts and was therefore not a responsible party (RP) for broader regional groundwater impacts. Lewis recommended no further investigation associated with the former dry-cleaning facility and Stantec was able to successfully obtain concurrence from the DTSC.

CERCLA Claims Evaluation, Former Rolling Steel Mill, Jordan Downs, California (Principal Geologist/Expert Witness)

Lewis provided expert witness/litigation support services on a CERCLA claims evaluation legal case associated with the former operation of a rolling steel mill located in Jordan Downs, California. The property was purchased by a local housing agency (as the Plaintiff) for redevelopment into a mixed residential and commercial property. The property was impacted with heavy metals, VOC's, TPH and PCBs as a result of the historical use of the property for various industrial uses, which resulted in the Plaintiff filing a claim against the former defendants. Services provided by Lewis included broad historical research into past and present activities performed at and adjoining the Property, preparation and submittal of expert witness reports, depositions and the design and implementation of field investigation programs, and collection of data in support of the defendants. Based on the expert witness litigation services Lewis had provided, Stantec was asked to additionally represent multiple other defendants in the case. The case was settled to the satisfaction of the clients represented.

Former Automotive Wheel Manufacturing Facility, Gardena, California

Lewis conducted research and provided litigation support for a case associated with a claim against the client involving both petroleum hydrocarbons and chlorinated solvent impacts with multiple responsible parties. Lewis provided research and technical support in the preparation of an Expert Witness Report, which presented professional opinions regarding UST operations and subsurface contamination that resulted from an unauthorized release of petroleum hydrocarbons and chlorinated solvent impacts to soil and groundwater. The Stantec report was provided to the United States District Court and the case was settled in the interest of the client.

Azusa Land Reclamation Landfill, Azusa, California, Non-Conforming Lead-Impacted Soil Disposal, Positional Report & Corrective Action Workplan. LARWQCB Lead Regulatory Oversight Project

Lewis provided technical support to resolve the placement of non-conforming soil at the Azusa Land Reclamation Landfill located in Azusa, CA. Approximately 6 roll-off bins of lead-impacted soil that had been profiled as non-RCRA California hazardous waste (results identified an STLC of 8.34 mg/L) and designated for disposal at a facility licensed to accept the waste located in La Paz, Arizona, was inadvertently directed by the excavation subcontractor coordinating the disposal activities to the Azusa landfill.

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

The Azusa landfill is a former sand and gravel extraction pit that is now being used as an inert waste landfill operated by Waste Management. The placement of the non-conforming lead impacted soil occurred in an unlined area of the landfill. Based on the permeable/porous characteristics of the landfill and threat to groundwater, the non-conforming soil would need to be removed under the regulatory oversight of the LARWQCB. A notice of violation (NOV) was issued to the operator by the LARWQCB, which required the development and implementation of a corrective action workplan (CAP) and the removal of the non-conforming soil under an 1150 permit issued by the SCAQMD to a facility that could accept the lead-impacted soil.

Stantec developed the technical approach and scope of work for the CAP to remove the non-conforming soil by excavation and transportation of the soil to an appropriately licensed facility. Confirmation soil samples were collected to verify the removal of the non-conforming soil to the satisfaction of the LARWQCB and to close out the NOV that was issued to the Azusa Landfill. The 95% UCL for the confirmation soil sampling (basal and sidewall samples) was calculated to be in the range of 30-35 mg/kg, which was well below the cleanup goal of 320 mg/kg approved by the LARWQCB.

Vapor Intrusion / Methane Site Assessment & Mitigation-Related Projects

Confidential Healthcare Client, Medical Office Building (Lease) Remodel (Playa Vista), Los Angeles, California, Phase I & Phase II ESA's, PCA, Water Quality Testing Vapor Intrusion & Methane Mitigation System Design & Installation Services

Lewis is the technical lead and project manager for the assessment and mitigation of vapor intrusion conditions (to include methane) identified at a commercial office building that will be remodeled into a medical office building. The scope of services provided included the completion of Phase I and Phase II ESA's, a Property Condition Assessment (PCA), and vapor intrusion investigations to evaluate the presence of volatile organic compounds and methane within the subsurface of the building. The results of the methane testing were used to establish the methane design basis in accordance with LADBS site testing standards and city ordinance for methane mitigation systems. Stantec assisted the general contractor on behalf of the client to provide additional architectural design considerations and implementation of the mitigation systems as a retrofit of the existing building. Air monitoring was provided during the installation of the sub-slab passive methane mitigation piping system based on the detection of up to 100% methane beneath the building slab during the assessment phase of the project. In addition, water quality testing was completed by Stantec to evaluate the existing water supply quality and enable decisions to be made on equipment that may be needed to meet the client's healthcare standards and existing state and federal water quality standards for occupancy by its personnel and visitors for use as a medical office building.

Confidential Healthcare Client, Medical Center Hospital Expansion Project, Harbor City, California, Methane Site Investigation to Establish Methane Design Basis.

Lewis directed an investigation for methane for a proposed expansion building to the South Bay Medical Center located in Harbor City, CA. The investigation comprised the completion of soil borings, installation of triple-nested soil vapor probes and the collection and analysis of soil vapor samples to evaluate the presence of methane. The scope of work was completed in accordance with the site testing standards established by the LADBS to determine the methane design basis and adoption of appropriate methane mitigation measures.

Waste Management & Solid Waste Landfills

Proposed Water Line Utility, Former Burn Dump (Solid Waste Landfill), Saticoy, Ventura County, CA

Lewis was the technical lead and directed the completion of a noninvasive geophysical survey to evaluate the presence of refuse at an historic burn dump that was located in the proposed alignment of a water utility line that would traverse Camarillo, Saticoy and Ventura, CA. The scope of work included historical research and review of aerial photographs to evaluate the former burn dump/solid waste landfill, completion of seismic transects to identify the lateral and vertical extent of refuse and the potential for the directionally drilled water utility line that would pass beneath the former burn dump. Consultation with the City of Ventura and the Ventura County LEA was integral in successfully demonstrating that the proposed water line installed at a depth of 90 to 100 ft. beneath the former burn dump that would daylight along Saticoy Avenue would not encounter or disturb refuse that was placed in the historic burn dump/landfill in the mid to late 1930's and was subsequently closed and currently existed as a present-day maintenance yard. Soil borings were completed to verify the seismic transect geophysical data and log soils to either confirm the presence, or absence of solid waste. Lewis recommended approach to the client as the City of Ventura was successful and integral to the project proceeding and obtaining a letter of concurrence of findings and no further action warranted.

Azusa Land Reclamation Landfill, Azusa, California, Non-Conforming Lead Impacted Soil Disposal, Positional Report & Corrective Action Workplan. LARWQCB Lead Regulatory Oversight Project

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Lewis provided technical support to resolve the placement of non-conforming soil at the Azusa Land Reclamation Landfill located in Azusa, CA. Approximately 6 roll-off bins of lead-impacted soil that had been profiled as non-RCRA California hazardous waste (results identified an STLC of 8.34 mg/L) and designated for disposal at a facility licensed to accept the waste located in La Paz, Arizona, was inadvertently directed by the excavation subcontractor coordinating the disposal activities to the Azusa landfill. The Azusa landfill is a former sand and gravel extraction pit that is now being used as an inert waste landfill operated by Waste Management. The placement of the non-conforming lead impacted soil occurred in an unlined area of the landfill. Based on the permeable/porous characteristics of the landfill and threat to groundwater, the non-conforming soil would need to be removed under the regulatory oversight of the LARWQCB. A notice of violation (NOV) was issued to the operator by the LARWQCB, which required the development and implementation of a corrective action workplan (CAP) and the removal of the non-conforming soil to a facility that could accept the lead-impacted soil. Stantec developed the technical approach and scope of work for the CAP to remove the non-conforming soil by excavation and transportation of the soil to an appropriately licensed facility. Confirmation soil samples will be collected to verify the removal of the non-conforming soil to the satisfaction of the LARWQCB and to close out the NOV that was issued to the Azusa Landfill.

Mission Canyon Landfill, Subsurface Exploration & Encroachment Study, Los Angeles County, Chief Executive Office, Capital Projects/Debt Management, Los Angeles, California

Lewis completed an encroachment assessment study for a former landfill located in Los Angeles County, CA. Stantec was tasked with completing a review of various sources of information (LA County Sanitation District solid waste records, topographic maps, aerial photos, geophysical surveys, parcel maps, etc.) associated with the Mission Canyon Landfill and conducting an evaluation on the extent of refuse and its potential encroachment onto adjacent private residential properties, as well as the encroachment from the adjoining private properties onto the County-owned landfill. The Mission Canyon Landfill operated between 1960 and 1965. Based on subsurface exploration activities and soil boring logs completed on the landfill in 2012, typical waste materials deposited included, but was not limited to, debris identified as: wood, newspaper, plastic, glass, tile, ceramics, concrete, wax paper, steel wool, fabric, asphalt, leather, charcoal, and burlap wrap. During this period of time, the land adjoining the landfill around its northern perimeter was subject to grading activities and development into predominantly residential housing and other private properties.

Stantec evaluated and compared the available data regarding the likelihood of two key scenarios that may have occurred related to the Mission Canyon Landfill and the adjoining private residential properties located along its northern-most boundary. The two key scenarios were identified as the likely potential for: 1) encroachment of refuse from the Mission Canyon Landfill beneath private residences; and 2) Encroachment by private residential properties onto the Mission Canyon Landfill. Stantec presented their findings and worked with the Chief Executive Office of the Los Angeles Department of Public Works to develop mutually acceptable strategies to resolve both the Counties encroachments onto private property, and the neighboring properties encroachment onto the LA County Mission Canyon Landfill.

Hazardous Waste Program Manager, Chevron Pipeline Company, California (Principal Geologist, Program Manager)

Lewis was the lead hazardous waste program manager providing hazardous waste management services for Chevron Pipeline Company across the State of California. Projects managed were associated with new construction capital projects as well as operation, maintenance, decommissioning and site assessment/remediation services. In addition, Lewis developed a comprehensive Waste Management Guidance Document for CPL. From this document, site-specific waste management plans were created on a per-project basis. Lewis managed the storage, handling and disposal aspects of multiple waste streams generated from on-going operation and maintenance of existing CPL facilities, as well as new capital construction projects. Waste minimization in full compliance with local, state, and federal regulations and cost savings were a major focus and driving force for the waste management services delivered to CPL.

Former Bakery/New Target Store Construction, San Pedro, California (Project Geologist)

Lead-impacted soils were inadvertently identified at a former bakery site in San Pedro, California during grading and were initially deemed to be RCRA Hazardous or Non-RCRA California hazardous waste. Based on a cost-effective site-specific sampling and analysis plan developed in accordance with current regulatory and health and safety guidelines, Lewis was able to profile and dispose of the soils as non-hazardous waste, thus enabling the Target Corporation to avoid liability as a hazardous waste generator and the resultant associated tax implications. By working effectively with the subcontractors and Target's designated construction group, Lewis was able to minimize down-time, while providing significant cost savings and adherence to regulatory guidelines for the correct characterization and disposal of soils from the site. Cost savings were provided to Target in the form of reduced transport, handling, and significantly lower disposal costs, as well as avoiding long-term liability as a generator of hazardous waste and the associated tax implications.

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

He expedited management of the characterization, excavation, and disposal of soils—critical given the construction schedule for the redevelopment of the former bakery site into a Target Store. Environmental consulting work also performed at this location that included obtaining an NFA/Case Closure status from the LARWQCB for the former underground storage tanks; evaluation of a former railroad spur for potential heavy metals, pesticides, and herbicide impacts or waste characterization purposes.

Renewable Energy Projects (BESS, Solar & Wind)

Various Sites – Proposed BESS Phase I & II ESA's

Lewis is the technical site assessment and remediation lead for multiple technical studies for proposed redevelopment renewable energy projects, which have included the completion of Phase I ESA's, Phase II ESAs, and the preparation of remedial action workplans under the regulatory oversight of the DTSC. Some specific project examples are provided below:

Proposed BESS Redevelopment Project, El Cajon, California

Lewis is providing technical support and advisory services for the proposed lease of a former aerospace manufacturing facility located in El Cajon, California. The services include the preparation of a Phase I ESA Report, Soil Management Plan for the proposed demolition and construction phases and technical advisory role based on the former use of the facility that resulted in impacts to the subsurface and source removal work that indicated residual impacts that need to be managed for the proposed redevelopment of the Site into a BESS facility.

Phase I ESA, 2,010 Acre Solar Renewable Energy Project, Glendive, Montana

Lewis managed the completion of a Phase I ESA under ASTM E2247-16 for a proposed solar renewable energy project located to the west of Glendive, Montana. In addition, based on the completion of a Critical Issues Analysis (CIA) Report, the scope of work included research and mapping of all rights of way, easements, and utilities (above and below ground).

Phase I ESA, Phase II ESA, Hazmat Survey & Remedial Action, Battery Energy Storage Site (BESS), Los Angeles County, CA.

Lewis managed multiple scopes of work associated with the redevelopment of a former automotive recycling facility into a BESS facility located in Los Angeles, CA under a Voluntary Cleanup Agreement with the DTSC. To date, the work completed includes Phase I ESA's (for two parcels), Phase II Environmental Site Assessments (soil and soil vapor), pre-demolition hazardous material surveys, geotechnical soils testing and the implementation of a RAW under the lead regulatory oversight of the DTSC. In addition, Lewis completing the expedited permitting and case closure for three undocumented USTs. The RAW was completed in May of 2023 (targeted cleanup goals met) and the RACR including the recording of a LUC. The Site is currently an active BESS facility.

Phase I & II ESA's, 30-Acre Proposed Solar Renewable Energy Project, Moorpark, CA

Lewis managed the completion of a Phase I ESA for a proposed solar redevelopment project. Based on the findings of the Phase I ESA, a Limited Phase II ESA was completed to evaluate the potential for impacted soil as a result of the former uses of the Site that included the import of fill material from multiple unknown sources, storage of vehicles in poor condition, as well as the presence of pesticides and herbicides due to the historic agricultural use of the Property. The work was expedited due to a limited escrow period.

Phase I ESA, 3,700 Acre Proposed Wind Farm Project, Confidential Renewable Energy Client, Alameda County, California

Lewis managed the completion of a Phase I ESA for a proposed windfarm that encompassed approximately 3,700 acres and comprised 17 contiguous legal parcels. The Phase I ESA was conducted in conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13, and All Appropriate Inquiry (AAI) as defined by the US-EPA in Title 40 of the Code of Federal Regulations, Part 312, except as may have been modified by the scope of work, and terms and conditions, requested by the Client.

Due to the size, accessibility, and rugged topography of the Property, the site reconnaissance was conducted in general accordance with ASTM Standard E2247-16: Phase I Environmental Site Assessment Process for Forestland or Rural Property. The Phase I ESA was completed to support the clients' planning aspects of the project under CEQA. The property was used previously for wind power generation; however, the client intends to upgrade the study area with modern wind turbines as part of an approved wind repowering project.

Transportation/Roadways

Initial Site Assessment Study, Moorpark West Studios, Moorpark, California. Highway SR118 Widening Project (Principal Geologist, Project Manager)

Lewis coordinated the completion of an Initial Site Assessment (ISA) in accordance with Caltrans Standards for the widening of Highway SR 118 (Los Angeles Avenue) associated with the proposed Moorpark Studios Project located in Moorpark, CA. The widening of the highway resulted in testing soils for potential impacts from aerially deposited lead as well as the nearby agricultural land that utilized pesticides/herbicides. Scope of services included the preparation and implementation of a technical site assessment workplan and outreach to private landowners to obtain access agreements to perform the soil testing adjacent to the 118 Freeway.

Initial Site Assessment, Bluebird Canyon, Laguna Beach, Orange County, California

** denotes projects completed with other firms*

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Lewis provided technical consulting and a Phase I ESA for a proposed road widening project located in Laguna Beach, California. Scope of services included CEQA/EIR support associated with hazardous materials and the completion of a Phase I ESA. The project involves the widening of the canyon road and the identification of potential anticipated impacts associated with the proposed demolition and construction phases of the proposed project.

Interstate 210/215 Soil Sampling, San Bernardino, California (Project Manager/Field Coordinator)

Lewis served as project manager/field coordinator for the completion of soil sampling for aerially deposited lead (ADL) analysis along the Interstate 210/215 Freeways in California. The proposed scope of work was intended to evaluate whether excavated soil generated during the proposed improvements to the freeways would result in the need for special handling or disposal (as defined by Title 22 of the California Code of Regulations) with respect to ADL. To evaluate appropriate handling procedures for excavated soil as a result of proposed Caltrans improvements, the collected samples were analyzed in a California certified laboratory for total lead. In addition, select samples were also analyzed for pH and soluble lead following the California Waste Extraction Test (where total lead exceeds 50 mg/kg) and the Toxicity Characteristic Leaching Procedure (TCLP) (where Cal WET results exceed 5 mg/L). Tasks included coordinating several soil-sampling teams and the processing, collection, and logging of multiple soil samples.

Environmental Site Assessment & Remediation Projects

Former Dry Cleaners, Simi Valley, California, Site Assessment & Remediation

Lewis is currently managing the completion of site characterization and corrective action for a former dry-cleaner business that had an unauthorized release of chlorinated solvents (principally PCE and TCE with degradation products of cis-1,2-dichloroethylene, 1,1-dichloroethylene, trans-1,2-dichloroethylene) to shallow soil and groundwater. With lead regulatory oversight provided by the LARWQCB, Lewis prepared a technical corrective action workplan (CAP) to address the impacts, as well as evaluate potential vapor intrusion conditions. The evaluation of soil vapor conditions post-excavation and removal of impacted soil combined with groundwater monitoring was used to demonstrate the effectiveness of the corrective action. With current redevelopment plans undetermined and groundwater conditions at or below their respective MCL, monitored natural attenuation of residual soil vapor (detected post excavation of secondary source impacts to soil) and continued groundwater monitoring and reporting is being considered as an approach to the low-risk conditions at the site.

Ozone Sparge System Installation and O&M, La Habra, California (Principal-in-Charge)

Lewis provided oversight for the installation, operation, and maintenance of an ozone sparge system at a former logistics/refrigeration facility in La Habra, California. The site was owned by an international redevelopment company that specializes in large-scale residential developments. Work comprised soil, soil vapor, and groundwater sampling for halogenated volatile organic compounds (HVOCs) that were migrating onto the site from an upgradient source. Work included the installation of 40 independent ozone sparge points and their connection (via above ground pipework) to two independent skid-mounted ozone sparge units capable of generating up to 1.5 and 2.5 pounds of ozone per day, respectively. Liaison and regulatory oversight from the Orange County Health Care Agency (OCHCA) and the Santa Ana Regional Water Quality Control Board (SARWQCB) were an integral part of the project. The agencies ensured that the source and potential responsible party for the release of the HVOCs into shallow soil and groundwater could be identified and the source removed to prevent further continued migration of HVOCs in groundwater and soil vapor onto the site. The site is now redeveloped into single family housing.

San Gabriel Superfund/LARWQCB Led Multi-Media Site Assessment, School Bus Fleet Maintenance Yard, Rosemead, California (Technical Lead/Project Manager)

Lewis is the technical lead and project manager for a multi-media site assessment at a bus service maintenance yard located within the San Gabriel Superfund Operating Unit. Following the completion of a chemical use inventory questionnaire and pursuant to a LARWQCB letter dated March 24, 2016 (Requirement for Technical Report Pursuant to California Water Code [CWC] Section 13267 Order), the client was required to submit a workplan to conduct a multi-media site assessment of the property. A Technical Work Plan for a Site Assessment dated July 13, 2017, was submitted, and comprised the advancement of 8 soil borings to a maximum depth 45 feet bgs, conversion of the borings into triple-nested soil vapor wells, and the collection of soil, soil vapor, and groundwater samples for submittal to a fixed-base laboratory for chemical analyses. Based on the scope of work completed, Stantec was able to demonstrate that the historic and current bus service maintenance operations had not contributed to the constituents of concern (primarily VOCs [chlorinated solvents]) documented in groundwater associated with the San Gabriel Superfund Operating Unit, and therefore should not be identified as a potential responsible party and no further assessment of the property as it relates to the Superfund is warranted.

* denotes projects completed with other firms

Lewis D. Simons CAPG #7976

Principal Geologist, Practice Leader, Environmental Services

Phase I ESA/Property Transfer – Westlake Village Golf Course, Westlake Village, California (Client/Project Manager)

Lewis performed and managed a Phase I ESA of the Westlake Golf Course located in Westlake Village, CA, in accordance with the methodology and protocol of the American Society of Testing Materials (ASTM) Standard Practice for Environmental Site Assessments ("Standard" E 1527-05). Work included a review of available government agency files; an environmental record search of interviews with property owners and regulatory agencies; submittal of report to the client, including recommendations for Phase II assessment and sampling, when appropriate. The assessment of the property included critically important document reviews for a third-party off-site release of chlorinated solvents that had migrated beneath the Property via shallow groundwater. Stantec was able to demonstrate that the concentrations in groundwater were low (marginally above the MCL) and that a responsible party had been identified with regulatory agency oversight provided by the DTSC and the LARWQCB.

PUBLICATIONS

An Initial Environmental Review (EIR) Report. EIA, Auditing & Environmental Management Systems, 2002.

Lewis completed a Study to evaluate supply chain pressure and the implementation of ISO14001 for Albon Engineering PLC located in Rochford, UK. The engineering firm manufactures cam rods, bearing caps, cylinder heads, and other critical equipment parts for their clients such as Caterpillar, Ford, GM, Perkins Diesel, Cummins Diesel, Volvo, and others. The study involved assisting their Quality and Environmental Health and Safety Department with the implementation of ISO14000 and the collection and analysis of data associated with waste, energy, and other metrics in support of becoming compliant with the standard. The study evaluated the pressure experienced by Albon from their key clients to achieve ISO 14001 certification, but also how they could work to promote and demonstrate their supply chain is actively taking demonstrable steps to become compliant with the standard.

** denotes projects completed with other firms*

Appendix C User-Provided Records

PHASE I ESA USER'S QUESTIONNAIRE

In order to qualify for protection from land owner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-13 and the federal AAI rule (40 CFR 312) require that the User of the Phase I ESA report provide certain information (if available) to the Environmental Professional completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the Environmental Professional may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed. Return the completed questionnaire to Stantec.

1. Property Information

Property Name: 35R LOAP

Property Address(es): 4026 Skyline Rd

City: Tupman State CA Zip 93276

Property Owner Name: California Resources Corporation

Property Owner Phone#: (661) 763-6219

2. Contact For Site Access

Name: Brandon Myers

Company/Organization/Title: California Resources Corporation / Midstream Manager

Phone# (661) 763-6219 E-Mail Address: brandon.myers@crc.com

3. Environmental Cleanup Liens. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

☒ Yes ☐ No

If yes, describe or attach details of the lien Land Use Condition proposed in 2025.

No drilling for water, oil, or gas without prior approval by DTSC.

No extraction or removal of groundwater without a Groundwater Management Plan pre-approved by DTSC.

4. Activity and Land Use Limitations. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded as applicable to the property as a result of environmental contamination, investigation, cleanup, or related matters?

☒ Yes ☐ No

If yes, describe or attach details of the limitations Proposed Land Use Condition in 2025

Expect limitations on construction of any enclosed, occupiable structures and Soil Management Plan implementation during construction

No residential use, hospitals, schools for person under 18 years of age, and daycare for children, vapor intrusion evaluation.

- X _____ Yes _____ No

This site was the former home of Elk Hills Lean Oil Absorption Plant (LOAP). The plant used a lean oil separation process to separate Methane and NGL components from a "wet gas hydrocarbon stream". Gas products were sent to a sales gas pipeline. Liquid products were sent to offsite storage.

- _____ Yes _____ No

No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the property?

☒ Yes (describe) VOC in soil gas across majority of AOC 092, release are unknown.

☐ No

Do you know of any environmental cleanups that have taken place at the property?

☒ Yes (describe) Soil mixing pilot study (Jun/Jul 2020) evaluated soil mixing as option to reduce VOCs in soil gas

Excavated limited soil impacts to a max depth of 7 feet bgs

☐ No

8. The Degree of Obviousness of Contamination. E1527-13 and the federal AAI rule (40 CFR 312.31) require that the Phase I ESA consider the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation. Based on your knowledge and experience related to the property, are there any *obvious* indicators that point to the presence or likely presence of contamination at the property?

☒ Yes (describe)

Note that potential soil source (former skid tank) southeast of AOC 092 preliminary boundary has not been investigated

BH-7 Found Impacted soils with staining and hydrocarbon odors at bottom of the 3 feet sample, throughout the samples at 6, 11, 16, 21, and 26.

☐ No

9. Availability of Previous Environmental Reports. Are you aware of previous environmental site assessment reports, other environmental reports, documents, correspondence, etc. concerning the property and its environmental condition?

☒ Yes (describe) Soil management plan (SMP) https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000010089

☐ No

10. User Intentions for the Subject Property. Please describe for what, with regards to the Subject Property, the User intends to use this Phase I ESA (e.g., to support redevelopment, to support potential acquisition of the Subject Property, to support leasing of the Subject Property, to support sale of the Subject Property).

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichloroethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent

Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F035

Waste Description:

Wastewaters, Process Residuals, Preservative Drillage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Inorganic Preservatives Containing Arsenic Or Chromium. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FORMER NAVAL PETROLEUM RESERVE - FORMER NAVAL PETROLEUM RESE (Continued)

S119777530

Facility Project Subtype: Not reported
RWQCB Region: CENTRAL VALLEY RWQCB (REGION 5F)
Site History: Department of Toxic Substances Control (DTSC) is the lead agency for this project. Central Valley Water Board's role is to assist DTSC in closing those areas of concern (AOCs) that are regulated under Central Valley Water Board waste discharge requirements. As such, only those AOCs with waste discharge requirements are entered into Geotracker. For information on all other AOCs, refer to DTSC's Envirostor database. Central Valley Water Board is assisting DTSC in the closure of approximately 55 sumps (AOCs) that are listed under Waste Discharge Requirements 59-491; 73-141; and 73-42. Central Valley Water Board's involvement is only with those AOCs that are regulated by WDRs. The project goal is to provide regulatory closure of sumps listed under the WDRs and ultimately rescind the WDRs. Any sumps that will remain active will be regulated under new, updated WDRs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024	Source: EPA
Date Data Arrived at EDR: 01/02/2025	Telephone: N/A
Date Made Active in Reports: 01/21/2025	Last EDR Contact: 02/03/2025

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PROJECT: NORTHEASTERN UNIVERSITY PFAS PROJECT

The PFAS Contamination Site Tracker records qualitative and quantitative data from each site in a chart, specifically examining discovery, contamination levels, government response, litigation, health impacts, media coverage, and community characteristics. All data presented in the chart were extracted from government websites, such as state health departments or the Environmental Protection Agency, and news articles.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

CALIFORNIA GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing

Department of Conservation

Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservation's Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

CALIFORNIA GOVERNMENT WELL RECORDS SEARCHED

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

UIC: UIC Listing

A review of the UIC list, as provided by EDR, and dated 12/02/2024 has revealed that there is 1 UIC site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
CALIFORNIA RESOURCES Well Status: Plugged		3 / 5	20

CIWQS: California Integrated Water Quality System

A review of the CIWQS list, as provided by EDR, and dated 11/20/2024 has revealed that there is 1 CIWQS site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
ELK HILLS OIL FIELD,	SEC 10, T31S, R24E	A2 / 2	19

EXECUTIVE SUMMARY

CERS: CERS

A review of the CERS list, as provided by EDR, and dated 01/12/2025 has revealed that there is 1 CERS site within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
ELK HILLS OIL FIELD,		A1 / 2	19

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: Corrective Action Report

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>
<i>CALIFORNIA RESOURCES</i> EPA ID:: CA4170024414	<i>28590 HIGHWAY 119</i>	<i>E 0 - 1/8 (0.064 mi.)</i>	<i>B9 / 6</i>	<i>45</i>

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>

Violation Date: 11-10-2021

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 11/15/2021. Elements of the Hazardous Materials Business Plan (HMBP) submitted onto the California Environmental Reporting System (CERS) are inaccurate and require updating. Please make the following corrections: 1) Business Owner/Operator Identification - Please update the environmental contact information. 2) Hazardous Materials Inventory - The following materials are listed as Trade Secrets. Please deselect them as a Trade Secret, or upload the proper trade secret form to the business plan for each individual material. -Frick Oil - Location: 7r k108 -Frick Oil - Location: 34s k119 -Frick Oil - Location: 14z k55-56, k89-94,k1 -Frick Oil - Location: 15z r3, r5, r6, r7, r38 -Please add the "Ambient Temperature" and "Ambient Pressure" for the following material. -KVA Transformer Oil - Location: 18g; 18g Reclamation Yard Violation shall be corrected within 30-days Michael Hernandez 661-862-8729 hernandezmi@kerncounty.com [Truncated]

Violation Division: Kern County Env Health Services Department

Violation Program: HMRRP

Violation Source: CERS,

Site ID: 53396

Site Name: CALIFORNIA RESOURCES ELK HILLS, LLC

Violation Date: 03-21-2019

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)

Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172,

S121787606

and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated

Violation Notes: Returned to compliance on 03/21/2019. During the inspection, it was observed that the Lab Waste was being removed every 2 years. Please have any satellite accumulation area remove their waste within 1 year or moved once it reaches the 55 gallon threshold. Also, please ensure that all containers are properly labeled to determine accumulation start dates. This violation was corrected on site and no further action is required.

Violation Division: Kern County Env Health Services Department
Violation Program: HW
Violation Source: CERS,

Site ID: 53396
Site Name: CALIFORNIA RESOURCES ELK HILLS, LLC
Violation Date: 10-18-2015
Citation: HSC 6.95 25510(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25510(a)

Violation Description: Failure to report a release or threatened release of a hazardous material to the unified program agency and to OES.

Violation Notes: Returned to compliance on 10/20/2015. CRC failed to contact the Agency on Sunday 10-18-2015 at 1324 when the release of crude oil and produced water was discovered. CRC contacted the Agency on Monday 10-19-2015 at 0851. This is the second violation of this type. The previous violation occurred on May 17, 2015 and resulted in an Administrative Enforcement Order (AEO)

Violation Division: Kern County Env Health Services Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 53396
Site Name: CALIFORNIA RESOURCES ELK HILLS, LLC
Violation Date: 03-21-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 04/02/2019. During the inspection, multiple drums of hazardous waste were observed on site to be past the 6 month accumulation time. Please have all overdue waste picked up by a certified third party hauler. Documentation/photos may be sent to saleenb@kerncounty.com. This violations shall be corrected within 30 days.

Hazardous Waste Summary:

Waste Code: D000

Waste Description: Not Defined

Waste Code: D001

Waste Description: Ignitable Waste

Waste Code: D002

Waste Description: Corrosive Waste

Waste Code: D003

Waste Description: Reactive Waste

Waste Code: D004

Waste Description: Arsenic

Waste Code: D006

Waste Description: Cadmium

Waste Code: D007

Waste Description: Chromium

Waste Code: D008

Waste Description: Lead

Waste Code: D009

Waste Description: Mercury

Waste Code: D010

Waste Description: Selenium

Waste Code: D018

Waste Description: Benzene

Waste Code: D022

Waste Description: Chloroform

Waste Code: D035

Waste Description: Methyl Ethyl Ketone

Waste Code: D039

Waste Description: Tetrachloroethylene

Waste Code: F001

Waste Description: The Following Spent Halogenated Solvents Used In Degreasing:
Tetrachloroethylene, Trichlorethylene, Methylene Chloride,
1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated
Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing

Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F002

Waste Description:

The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F003

Waste Description:

The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F005

Waste Description:

The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code:

F006

Waste Description:

Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code:

U122

Waste Description:

Formaldehyde

Waste Code:

U159

Waste Description:

2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code:

U328

Waste Description:

Benzenamine, 2-Methyl- (Or) O-Toluidine

FINDS:

Registry ID: 110070320101

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

Quarterly Update:	QUARTERLY UPDATE Quarterly Update Period: July 1, 2024 to September 30, 2024. On April 3, 2024, CRC Elk Hills submitted the 2023 Annual Inspection Report for the landfill at the Facility. Which was reviewed and approved by DTSC Permitting unit. FACILITY DESCRIPTION / HISTORY Occidental of Elk Hills, Inc. (Facility) is located about 27 miles west of Bakersfield near the center of the Elk Hills Oil Field (formerly the Naval Petroleum Reserve No. 1 [NPR-1]) along the western edge of the San Joaquin Valley in Kern County. The city of Taft is the nearest community and is located approximately ten miles southwest of the facility. The facility oversees oil production in a portion of the Elk Hills Oil Field that is about 47,985 acres or 75 square miles. This area has produced petroleum since 1919. On February 5, 1998, the U.S. Department of Energy (DOE) sold a portion of the property to the facility called 27R Waste Disposal Facility. This area is a closed and capped surface impoundment called 27R Hazardous Waste Trench Unit or Waste Management Unit (27R WMU). From 1975 until November 1985, 27R WMU received waste consisting of neutralized well stimulation fluids and tank bottom sludge. This waste was deposited into five unlined adjacent surface impoundments or trenches. These five north-south oriented trenches make up 27R WMU and equal about 6.08-acres. The approximate dimensions of the five trenches are: 85 by 390 feet, 85 by 420 feet, 120 by 420 feet, 70 by 320 feet and 60 by 260 feet moving west to east across 27R WMU, respectively. Each trench is about 5 feet deep. Prior to January 1978, the volume of wastes disposed into 27R WMU is not known. However from 1978 to 1985, the estimated total volume of disposed waste is 35,018 barrels of tank bottom sediment/sludge and 22,090 barrels of neutralized acid mixtures (one barrel is equal to 42 gallons). Closure included an engineered cap/cover over 27R WMU consisting of about 5 to 10 foot thick clean soil layer, a 2-foot thick clay layer or water infiltration cap placed over the clean fill soil, and about 1.5 foot thick vegetative soil layer at the surface. In 1990, a boring, near 27R WMU, was drilled to a 1,000-feet and groundwater was not encountered nor is groundwater being monitored. In March 1993, the engineered cap was completed. In November 1998, the current in-situ vadose zone soil moisture monitoring system was installed to monitor infiltration of surface water through the engineered cap. Post-closure care consist of routine site inspections, security system inspections and maintenance, vadose zone monitoring, civil surveys, and physical maintenance to identify and correct deterioration that might lead to a threat to human health or

the environment. An Annual Post-Closure Monitoring Report is prepared to document the post-closure care activities performed during a calendar year (January 1 through December 31) PERMITTING REGULATORY DESCRIPTION/ HISTORY In 1975, disposal operations at the 27R Waste Disposal Facility began under Regional Water Quality Control Board, Waste Discharge Requirements (WDR) order No. 73-141. In 1980, in response to Resource Conservation and Recovery Act (RCRA) regulations, the Facility owner applied to the U.S. EPA for a hazardous waste permit for disposal at the facility. EPA returned the application on the basis of the exemption clause in 40 CFR 261.4 which excluded certain wastes from oil exploration and production operations under federal regulations. State regulations, however, do not exempt exploration and production operations. In 1981, the State issued an Interim Status Document (ISD) to 27R WMU. The Facility operated under this ISD until operations were suspended by the Operator. In 1986, a Closure Plan for the 27R WMU was submitted and in 1987 a site characterization study was completed. In May 1991, DTSC approved the closure plan. In May 1992, a construction certification report was submitted to DTSC for review

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024	Source: EPA
Date Data Arrived at EDR: 01/02/2025	Telephone: N/A
Date Made Active in Reports: 01/21/2025	Last EDR Contact: 04/01/2025
Number of Days to Update: 19	Next Scheduled EDR Contact: 07/07/2025
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/19/2024	Source: EPA
Date Data Arrived at EDR: 01/02/2025	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895
Date Made Active in Reports: 03/06/2025	Last EDR Contact: 03/18/2025

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895

Number of Days to Update: 15	Next Scheduled EDR Contact: 06/30/2025
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2025	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2025	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/11/2024	Source: Department of the Navy
Date Data Arrived at EDR: 11/25/2024	Telephone: 843-820-7326
Date Made Active in Reports: 02/18/2025	Last EDR Contact: 03/04/2025
Number of Days to Update: 85	Next Scheduled EDR Contact: 05/19/2025
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/04/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/15/2024	Telephone: 703-603-0695
Date Made Active in Reports: 02/11/2025	Last EDR Contact: 02/18/2025
Number of Days to Update: 88	Next Scheduled EDR Contact: 12/02/2024
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/04/2024	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/15/2024	Telephone: 703-603-0695

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/04/2024
Date Data Arrived at EDR: 11/05/2024
Date Made Active in Reports: 01/27/2025
Number of Days to Update: 83

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
