Docket 24-OPT-05

Dear Commissioners,

I write to you to exhort you to please press NextEra to move their Corby Project to a more suitable location than that planned.

I greatly appreciate that you have provided an alternative site to that which NextEra has targeted in the Vacaville area. Moving the project to the Lambie Industrial Park is a far safer and more environmentally safe site.

The current proposed site will forever spoil prime agricultural land, and in the case of a fire, which has occurred often at other sites, poses a great danger to the Vacaville community. It could also shut down I-80.

The Lambie Industrial Park is already zoned for industrial use, and is located farther from sensitive sites such as homes and schools. This is also at least consistent with local policy. Furthermore, NestEra itself confirms such a change of location is feasible, just an inconvenience to them.

The lives of people, animals, and the preservation of prime farmland should certainly be paramount to any "inconvenience" to the company.

I sincerely hope you will take this action and assist in protecting us.

Marion Elkins
Vacaville, CA 95688
