Docket 24-OPT-05 Support for Lambie Industrial Park Site

Thank you for commissioners for addressing this new location for the Corby Project. Please urge Next Era to move their site from Kilkenny and Brynes Road (Prime AG Land) to the Lambie Industrial Park. This is a much better location than the Kilkenny and Brynes Road locations as they are in prime Ag Land and we don't want that near our agriculture and neighbors. This will effect the values of the homes that are near it. Therefore it is imperative that it is not located near homes.

The Natural Hazard Zone Disclosure companies have already stated that BESS systems will be included in their reports in the future.

Placement of BESS is critical as we don't want to ruin farmers crops nor do we want our air, soil and water that runs to the creeks and ultimately to the ocean. The current location is PRIME Ag-land.

Additionally the Lambie location is safer as it is further away from schools, homes and I-80. This location is also zoned Industrial which is where Solano County allows for BESS.

Please be sure that all battery energy storage systems do NOT use lithium ion batteries. We have and will have better options in the near future.

Although this is an inconvenience for NextEra, it is better for the community.

Please protect our community, it matters to us.

Thank you

Concerned resident and Realtor,

Alison Harris
