## **I support the Corby Project being located in the Lambie Industrial Park**

Thank you for commissioners for addressing this new location for the Corby Project at the Lambie Industrial Park. This is a much better location for the Next Era project than the Prime AG land of Kilkenny and Brynes Roads.

Lambie is already zoned Industrial which is what Solano County has requested for all BESS projects. Lambie is not close to schools, homes or I80.

BESS projects will effect the values of the homes that are near it. Therefore it is imperative that it is not located near homes. The Natural Hazard Zone Disclosure companies have already stated that BESS systems will be included in their reports in the future noting anything within a 2 mile radius of the BESS, just like with Industrial areas, airports, former federal ordinances and more.

Placement of BESS is critical as we don't want to ruin farmers crops nor do we want our air, soil and water that runs to the creeks and ultimately to the ocean. The current location is PRIME Ag-land.

Please be sure that all battery energy storage systems do NOT use lithium ion batteries. We have and will have better options in the near future.

Although this is an inconvenience for NextEra, it is better for the community and isn't that what matters.

Please protect our community, it matters to us.  
Thank you
