California Energy Commission

Dear Commissioners

I would like to take this opportunity to thank you for your attention to this project. Offering an option as to where this particular project or any potential Lithium Ion BESS projects should be built is truly appreciated. Being the neighbor closest, directly adjacent to the current proposed CORBY BESS project, just a canal ditch away, I could not be more thankful.

These types of energy systems should be placed in appropriately zoned areas and never in residential and/or prime agricultural land like the corner of Kilkenny Rd & Byrnes Rd., Vacaville, the currently proposed location. The thought of what life would be like for myself, my family and my neighbors when this system catching fire is heart wrenching. Living in fear of that happening either day or night is honestly exhausting and devastating. Being a second generation owner of this property, our goal is to protect our land, our residence, our family, our animals and our future. There are other locations that are safer and already zoned industrial.

Please demand that these companies are restricted to industrially zoned locations for the safety and the wellbeing of the surrounding areas.

With the most respect, I ask you to set this precedence and keep our community members safe.

Very concerned and most sincerely,  
Deanna "Dee" Cole
