Opposing the location Kilkenny and Byrnes rd

Dear Energy Commissioners,

I'm demanding that the Corby Bess project be moved to Lambie Industrial Park! The Lambie Industrial Park is a more responsible and better site for the Corby project. The current site is PRIME FARMLAND and puts our area and community at risk when a thermal runaway fire occurs! Lambie industrial site is safer and reduces the risk of impact of a thermal runaway incident, which is further from homes, schools, Kaiser hospital, senior communities and I-80....protecting our residents from toxic fumes and the closure of a major highway ! Next Era's own analysis confirmed that the Lambie Industrial Park is feasible and meets the core project goals . Their objectives are based on minor logistical "inconvenience", not genuine impossibility . if moving project causes a small delay for them (e.g. up to six months) it is a small price to pay , for the protection of our community for the next 30 years!

I strongly URGE the NextEra to move their project to the Lambie Industrial Park !

Thank you

AnnMarie Nielson - Vacaville resident
