## **Opposing the location Kilkenny and Byrnes rd**

Dear energy commissioners ,

I I'm in support of the alternative location at the Lambie Industrial site , This site is a much better location for all kinds of reasons if and when there is a disaster with these type of battery storage systems . This location is miles from all the possible problems at the Byrnes / Kilkenny locations that would be affected .neighborhoods , elderly locations with in tha, hospital ,retail area , hotels , hwy 80 major artery , prime ag land loss, what its going to take to cover all these areas if something is to go wrong is not possible to make sure all are safe. i hear it will Cause additional time and money to go with the lambie site . but is it really even reasonable to consider the Kilkenny location with all the possible problems that could happen. The lambie site is the correct location for all the right reasons if there was something to happen it gives .it gives the response teams time to react with out public risk. Thank you for your time to consider what's right .

sincerely,  
Matt Nielson solano county resident
