## **Battery storage**

My family moved to our Weber St home in the fall of 2019. We have worked hard creating not only a home for our family but a garden and resting place for many animals. We have taken this once barren property and have created the much needed food garden for insects, bees, monarch butterflies and other bugs along with lizards, frogs, owls and other birds needed to keep a healthy ecosystem. These bees play a vital part in the pollination process necessary for the many orchards and crops grown in this area. We have a well for our only source of water for drinking, gardening and for our farm animals. We are deeply concerned of the possible contamination of our water source and air quality if the battery plant leaks or catches fire. We understand the demand for energy but feel that the Lambie location in Fairfield would be the better place for this type of project due to the distance to housing and zoning. Let's do what we can to keep the beauty of the agriculture areas free from future damage to the ecosystem by keeping it free of this potential disaster.
