Docket 24-OPT-05: Support for Lambie Industrial Park Site

Dear Commissioner,

The Lambie Industrial Park is the much more responsible choice to locate the Corby Project. The current site is inappropriate because it destroys prime farmland and puts our community at risk if a thermal runaway fire occurs.

Please note that according to the National Fire Protection Association (NFPA), there is currently NO known protocol for effectively fighting a lithium battery fire; hence the term "thermal runaway," which means the fire cannot be extinguished until it burns itself out, releasing toxins in the air and endangering firefighters, local residents, and the ecosystem. Lambie is the better site because it is safer (further from homes, schools, and I-80) and already zoned for industrial use (conforming with Solano County's new BESS Ordinance).

In addition, the current site takes protected agricultural land out of production, violating the spirit of Measure T and the County's long-standing mission. Lambie avoids this destruction entirely.

Thank you for your consideration,

Veronica Westfall
Vacaville Resident
