Docket 24-OPT-05: Support for Lambie Industrial Park Site

Dear Commissioners

My wife Rose and I support the Corby Battery Project if it was located in a remote industrial area such as the Lambie Industrial Park! The county has approved that area for BESS, it's away from where people live and work and doesn't take up important agricultural land.

I am writing this email to share with you the concern my wife and I have with BESS, we would like you to prevent lithium ion battery storage facilities in Solano County.

We don't want another Moss Landing type disaster in Solano County like the most recent event which burned for 5 days with flames reaching 100 feet in the sky, our community's health and safety is on the line, this lithium battery fire and others that have happened in past years are impossible to extinguish and emit toxic smoke (which affect agriculture, evacuate residents from their homes, pollute water canals used for farming, it impacts local highways and puts additional stress on emergency responders. Battery energy storage systems need to be placed away from neighborhoods, highways, hospitals and environmentally sensitive areas, all of these situations listed exist in my neighborhood please don't put one in our back yard.

Thank you for your consideration

Norman & Rose Gorton
