## **Location of Corby BESS**

This is to state that the Corby BESS would be appropriately located in the Lambie industrial Park in Solano County. However, the site that they are requesting to be approved is near neighborhoods, a hospital, and a major freeway. Should the inherently unstable lithium-ion batteries catch fire and emit toxic gasses, it could mean the freeway is shut down, neighborhoods are evacuated, and possibly the hospital would face evacuation. Common sense states that the industrial area would be more appropriate for this type of facility.
