BESS approval and placement

I would hope that the CEC would take in consideration our precious farmland and community when approving the placement of a potentially hazardous BESS in Solano County. The Corby BESS should be placed in an Industrial Zoned area. I would also like to say if companies like this apply to the state to circumvent County Ordinances the CEC should require these companies to utilize safer technology existing in the United States. I urge you to consider our communities safety and rich farmland.
