Support to move Corby Energy proposed BESS project to Lambie Industrial Park

Current proposed BESS Corby Energy project location is not suitable on prime ag land at Kilkenny Rd. or other populated areas within Vacaville or Solano County. It also is located too close to I-80, Kaiser Hospital and local residents due to the inherent risk of lithium battery fire and hazardous air and water pollution potential posed by a runaway Lithium battery fire such as the Morse Landing Fire. Unpopulated industrial areas, such as Lambie Industrial Park are a safer location to mitigate at least some of the risks.
