Notice of Availability

HEEHRA Phase I Single Family Rebates

The California Energy Commission (CEC) is releasing additional funding for single-family rebates through the Inflation Reduction Act Home Electrification and Appliance Rebates (HEEHRA) Phase I Program.

The HEEHRA Phase I program provides up to \$8,000 in single-family rebates to income-qualified, California homeowners for the installation of a new, energy efficient heat pump HVAC system. HEEHRA rebates are only available to be submitted through a TECH-certified and HEEHRA-trained contractor.

Starting on October 15, California homeowners with existing, approved HEEHRA income verifications may submit a rebate reservation request. Homeowners should contact their TECH-certified and HEEHRA-trained contractor to express interest in submitting a rebate reservation request for a heat pump HVAC system. To check if you have an approved income verification and/or pending HEEHRA rebate reservation, email TECH.info@energy-solution.com.

Projects must be installed on or before **December 31, 2025**. Projects must have an approved reservation in order to be funded.

Amount of available funds varies by region and can be found at <https://techcleanca.com/heat-pump-data/budget-report/>.

The HEEHRA Phase I program continues to process and finalize rebate applications of completed projects for both single family and multifamily properties.

If you have questions about the HEEHRA rebate program or the status of your rebate, please contact TECH.info@energy-solution.com or the CEC's IRA Residential Rebates Customer Support Center at IRaresidentialrebates@energy.ca.gov or (916) 343-8471. Contractors who need support to complete a rebate reservation or rebate application should call (833) 256-0560 or email TECH.contractor@energy-solution.com.
