Comment Received From: Cireena Barajas-Tablit
Submitted On: 10/15/2025
Docket Number: 24-OPT-05

No for BESS

This project has not been thoroughly thought out. The public and residents of Solano county should be first priority when it comes to making decisions that could potentially affect their lives and property. The location for this project is not feasible. It poses substantial risk to neighboring properties. Safety and fire protection need to be at the top of the list of concerns. Next is the environmental impact this project will have. What toxic waste will be created? How will it be disposed of? Will these products affect our air quality and water supply? There are canals and other water supplies near by, how will they be affected.

A more appropriate place for this project would be an industrial zone. The refineries are set to leave CA soon. Why not see if that space is able to be converted into a battery plant instead. It's close to the water in case of emergencies. And it's already zoned for that industry.

Please consider the wellbeing and safety of our towns citizens over businesses who are only for profit with no intention of caring for the community it wishes to change.
