Subject: Docket 24-OPT-05: Support for Lambie Industrial Park Site

Dear Commissioners,

Thank you for taking the time to consider the alternative site of Lambie Industrial Park for the Corby Battery Energy Storage System (BESS) project. As a resident of the unincorporated area of Solano County near Vacaville, the location of this BESS facility is very important to me, and I strongly urge you to instruct NextEra to move this project to the much safer Lambie Industrial Park site.

I just don't understand the rationale of putting a small amount of their profit over the safety of our people, community, and the livelihood of our farmers should there be a runaway fire. The possibility of toxic chemicals from the water used on a fire getting into our ground water affects all of us, especially families like mine who get all of our water for drinking, irrigation, and livestock from our well. It also doesn't make sense to permanently give up prime agriculture land that provides food for our country when there is a much safer site that is already appropriately zoned that preserves that land for growing food.

NextEra's objections based on minor logistical issues for which there are some fairly simple solutions are really ridiculous for a company that makes billions of dollars. Moving the project to Lambie Park is really a win-win with a minor additional cost for a company with these enormous resources. The county residents will be satisfied with the solution, and it will make for a much easier process for them.

Once again, I strongly urge you to instruct NextEra to move the Corby BESS project to Lambie Park as the best and safest possible location for the residents of Solano County. I appreciate your consideration and time.

Thank you,

Audra Orr
