Corby Battery Energy Storage System Project- Docket Number 34-OPT-05- OBJECTION

I am writing to vehemently object to this project being permitted to move forward on the proposed land in Vacaville, CA. A lithium-ion battery storage facility would cause immense harm to the residential area and residents in very close proximity. It is unethical and detrimental to public health to allow such a facility to be built so close to where people live. The fire hazard this poses, in an already high danger fire area is irresponsible and the toxic material from this type of facility should not be permitted. It is the city and state's responsibility to act in the best interest of its residents and tax payers, and this project is putting health, lives, land, people and animals at risk. By allowing this battery storage facility to be built, you're knowingly endangering the public and creating a liability for the city, state and owners of this facility when something inevitably happens. This type of facility should NOT be allowed to be built near where people live due to the extreme risk involved.
