opposition of battery facility

To whom it may concern,

Common sense would tell us that building a lithium battery facility next to/ or near the populated town on Vacaville is a bad decision. So, it would still be a bad decision to build this facility in the county, right?!?!?!? I mean, you can't possibly be in the dark about the fire at the facility in Moss landing... that was difficult to extinguish, released toxic smoke, caused evacuations, shut down schools, raised safety concerns, and contaminated the environment with toxic metals. Yeah, that's a great things to have around the area that your family lives.... Let's build this out in the middle of the desert with no close towns?!?!?!? What a concept!
