Opposed to battery storage sites in Vacaville

To whom it may concern:

As someone who lives 11 min from this proposed storage site, I am very concerned. I have five children and have lived in this area over 15 years. I happened to come across a post about this but never received anything in the mail to notify us this was happening. This site is too close to local farms and homes to store this type of hazardous material. This isn't the 50/60s anymore, the local population and livestock long term affects need to be considered. These sites should be built further away from populations to ensure time is given with distance in the event of containment failure due to thermal runaway or any other failure causing event.
