NOT approved Lithium Storage Plant

My job as a parent of 3 is to keep them safe. A lithium storage plant is unsafe. I would consider moving if one is built near us. It risks having unsafe air quality due to having a plant near us, although there may be measures to keep it safe, fires and accidents happen... and people just lie, literally dumping bad stuff into the air but saying it's safe. This is the same issue with the air quality and hazardous materials. I don't want my children or my children's children to grow up this close to such a hazard. That's why we moved here. Maybe you'd like to move your backyard next to the plant for a few years, let us know how safe you feel.
