Docket Number: 25-BSTD-03

Technology

To whom this may concern.

As an active part of the Combustion Engineering community. This legislation, although promoting emissions reduction, is an uneducated decision. You are putting the legislation before the technology even exist. Those Manufacturers that promote the NOx emissions you ask for, are in fact not able to meet sub 5ppm NOx @ 3% O2.

This legislation and market volume is shying all burner Manufacturers from investing in R&D for this small market.

The Legislators should educate themselves.
