## **Opposition**

This project poses serious safety risks to our community. Large lithium-ion batteries have caught fire in other cities, releasing toxic smoke that's extremely difficult to control. Vacaville has already faced wildfire threats, we don't need another potential ignition source near our homes.

Our first responders also aren't fully equipped to handle battery fires of this scale, and that puts both them and nearby residents at risk.

Until independent safety studies are completed and clear emergency plans are in place, this project should not move forward.

Thank you for your time and for prioritizing the safety of our community.
