## **Proposed Sites**

The proposed locations east of Leisuretown Road in the vicinity of Elmira are too close to residential properties and the proposed growth corridor for Solano County. The proposed N Meridian Road site, near the power distribution lines makes more sense. It's already industrial, has freeway access and is less density populated. If Solano County must have such a facility, placing it in the middle of the growth corridor is not a good plan. Especially considering what happened in Moss Landing. What kind of safeguards will be in place to prevent this kind of disaster here?
