## **vacaville Bess location**

The Lambie site I have heard about recently sounds promising. It follows our county's policy. It's a huge industrial area 1,500 acres with the closest home 4 miles away. It already has a gas power plant there with associated electrical infrastructure. It's A perfect location for a BESS. It's not on prime ag land, it's not near homes or cities. It's remote. Corby's own analysis states that it's possible to locate the project there. They just need to run a longer power line or change some paperwork.

Corby is stating it's "too hard" and "not feasible" and "will cause delays" and I don't care if it costs Corby more. They willfully overlook that this project is too risky on Kilkenny and Byrnes Road. It doesn't belong there. They cannot wave their hand and dispense with valid objections from the community.
