No Lithium Storage Facility in Vacaville

I reside in Vacaville and I oppose the building of a lithium battery plant - The Corby Energy Storage Project. For one reason - public safety. I don't give a damn about revenues or possible job opportunities as it all will be at the expense of human lives. I suppose the residents of Vacaville and Dixon have no value to those who support this project. These lithium storages have an inherent risk of catching on fire in a process called 'thermal runaway'. During that fire, they could burn for multiple days and cause residents to evacuate and emit toxic fumes into the air. How about build a facility near nothing so no one will worry about possible health issues due to exposure to toxins. Unfortunately, it will happen. It has happened.
