## **Corby Project**

A massive lithium-ion battery energy storage system (BESS)â€”spanning 40 acresâ€”is being proposed on protected agricultural land, just miles from my home. These facilities have a history of fires, toxic smoke, and environmental damage (just ask the citizens of Moss Landing). They belong in industrial zones, not neighborhoods.

I believe renewable energy should never come at the cost of our peopleâ€™s well-being. Vacaville should grow wisely, with transparency, safety, and respect for its people. Both Solano County and the City of Vacaville have established safety rules for BESS, but energy companies are bypassing this at the state level.

The citizens of Vacaville do not want this lithium-ion battery plant anywhere near our city, our neighborhoods, our homes.

Sincerely,  
Julie Rose  
Vacaville, CA
