## **Battery Storage**

Thank you for taking the time to read this...I actually hope that you have been flooded with these..

First let me say that I am not against battery storage...I understand that if successful in the process of accomplishing this it would be very helpful... at least to San Francisco it would be...I also understand that there are now 3 options to accomplish this to keep companies and residents happy.....so the storage can be built and the residents safe...its a WIN WIN...but its up to you....

2 are Safe and 1 is not Safe.....

Since Lithium Ion is the preferred material the storage companies want to use....than they can use it...in a Safe place....

SAFE... Option 1...Lambies Industrial Park using Lithium Ion

NOT SAFE Option 2...Lithium Ion in the exact locations they are wanting now

SAFE Option 3... the exact locations they want now with the exception of the material used...it will have to be a SAFE material...I don't have to break that down...you all know what I mean...

Please understand I say this with all due respect to you...

I know money is the biggest issue here...the storage facilities do not want to spend the additional money for a Safe location...this makes me fill like they are putting a PRICE on life...you have seen the dangers...I don't have to repeat any of them...I have lived by the gold mine of a Sub Station for 24 years...as a unmarried women and I have worked my tush off...lol...but have always felt safe...and the fact that one simple vote from a group of folks can take that all away just scares me to no end...

and not just from me....from 10's of Thousands of folks...I know Moss Landing was old technology.....but if you look back that's what they have said about all the others too...so until they can get their TECHNOLOGY figured out Lithium Ion should be kept away from Residential and Ag Lands...it is NOT SAFE...

The GREAT thing here is that you have 2 SAFE Options.....

Please consider your role in your vote when you make it.....

Please choose one of the SAFE options....

Please don't put a price on life...

Thank You  
Pam Barringer
