Protect Our Vacaville Neighborhood

We just moved here from the Bay Area to seek a safe and walkable neighborhood. We have invested our finances and our livelihoods into this beautiful farming community. If the Lithium-Ion battery storage facility is developed, we lose our home value and our walkable neighborhood and increase health risks, poor air quality, and water contamination. This proposal works against the community Vacaville has been improving including dog parks, schools and trails. It instead creates an undesirable city that will drive away current and future residents. We are proud of the city we now live in and request a thoughtful decision will be made to support our community and STOP the development of the Lithium-Ion battery facility.
